- 2016
Korea Masters Grand Prix Gold
Men's Single - Silver Medal

SHOES TECHNOLOGY

LIGHT PROFESSIONAL BADMINTON SHOES

Kumpoo developed shoes 99-100 in 2009. The new CBS functional rubber and counter-bolding system made the shoes become the lightest in the market.

KPU MATERIAL

Kumpoo was the first to use KPU material in professional badminton shoes, which enhances the wear resistance, stability and anti-deformation as well as extends the comfort life.

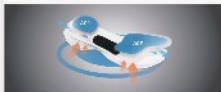

LEOBOOM MIDSOLE

As ETPU particles expand rapidly under high temperature and pressure, the unique "Leoboom" midsole is formed. By using the midsole, the shoe body is light and full, or power players can experience the explosiveness and agility of collection.

ACF ARTIFICIAL TECHNOLOGY

Inspired by the structure of cartilage, ACF technology controls micro-movements, making it absorb 90% of impact into the insole.

MUSCLE PILLAR

Inspired by the structure and function of human muscles, the built-in "muscle pillar" provides exceptional stiffness and greater support to the shoes. Built into the arch, it optimizes dynamic torsional resistance, offering the most stable platform during movement.

DUO POWER MIDSOLE

The unique design of the DUO POWER midsole features two layers, each with different densities and functions. The outer midsole is designed to be firm, providing solid support and excellent protection, while the inner midsole is softer, offering exceptional cushioning and comfort.

TECHNOLOGICAL INNOVATION

RACKET TECHNOLOGY

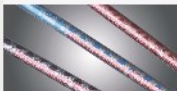

EAN ANTI-FAKE TECH

Built-in unique IC chip and a bottom cap, making it more difficult to replicate or tamper, offering near absolute and counterfeit protection. Take out the chip and use RAL-1 function to verify its authenticity.

GOLF SHAFT

Kumpon cooperated with FUJIKURA which was the most professional golf shaft manufacturer in Japan of badminton shafts. It can adjust the bending point of hitting effectively by keeping the same inner and external diameter of the shaft to satisfy the diverse demand of players.

HEXAGON SHAFT

It enhances the flex point of the shaft for quick rebound. The T-joint is optimized with a hexacted hexagon structure, strengthening the torsional resistance at the bottom of shaft, reducing the coloration angle by 7.2% compared to traditional radials.

Patent No. ZL200620201060.7

DUAL STIFFNESS PATENT SHAFT

It makes a racket offensive and defensive. There are two different stiffness on both sides of the shaft, offering distinctly different hitting sensations.

Patent No. ZL201420364704.2

10U-TOP LIGHT RACKET IN THE WORLD

44g, as light as an egg, but the tension can withstand up to 30LBS.

Patent No. ZL201922555792.5

KEVLAR MATERIAL

Bulldogproof Kevlar-fiber was used in the racket frame, including the full EAW ARX100 series rackets. This glass-reinforced carbon fiber with high tensile strength, making it a truly bulldogproof and armor-like racket.

GRAPHENE TECHNOLOGY

Using the stable graphene particles and high modulus carbon fibers on the frame, resulting in a powerful and stable 1000+ years' access to the racket, can easily withstand 35LBS with excellent anti-tension.

PLIERS TECHNOLOGY

Innovative EAW carbon cap has more excellent strength and stiffness. The load area of the cap and shaft has increased by 25% while the anti-tension increased by 40%, making the racket more stable and accurate.

Patent No. ZL202220048613.0

DISTRIBUTION MAP

GLOBAL STRATEGIC

TAKE THE CHALLENGE

This is more than just the slogan of Kumpoo, it is also the essence of brand culture. With full confidence and passion, Kumpoo people will create a century-old enterprise and a long-lasting brand with rigorous and pragmatic development concept.

With persistent and innovative spirit of striving, with the business purpose of integrity services, we will depict the brilliant take-off tomorrow for Kumpoo!

PENTAGONAL STRATEGY

Balancing Beauty and Function in the New Design

Harmony Between Art and Technology

MUTUAL COEXISTENCE

Environment protection and technology must and will coexist harmoniously.

LIVELY

Human vitality is enhanced by combining technological challenges with durable protective designs for everyday life.

DISTINCTIVE

Break conventions, do what others dare not, and incorporate this mindset into the products.

RAW

Whether on the court or in daily life, users can rely on the products without concerns about functionality and reliability.

SPIRITUAL

Master the body, satisfy the will, and break free from the physical limitations imposed by the universe.

Starting from the practicality required by the body,
we innovate and optimize to design products that will stand the test of time!

- Feather:** Natural goose feathers
Cork: Soft wooden cork
Quantity: 12pcs/tube
Application: Professional tournament
Stability: Class A, Class B

KUMPOO RED 2

- Feather:** Natural duck feathers
Cork: Compositated cork
Quantity: 12pcs/tube
Application: Professional tournament
Stability: Class A, Class B

KUMPOO RED 3

- Feather:** Natural duck feathers
Cork: Compositated cork
Quantity: 12pcs/tube
Application: Professional tournament
Stability: Class A, Class B

KUMPOO RED 4

- Feather:** Natural goose feathers
Cork: Compositated cork
Quantity: 12pcs/tube
Application: Professional tournament
Stability: Class A, Class B

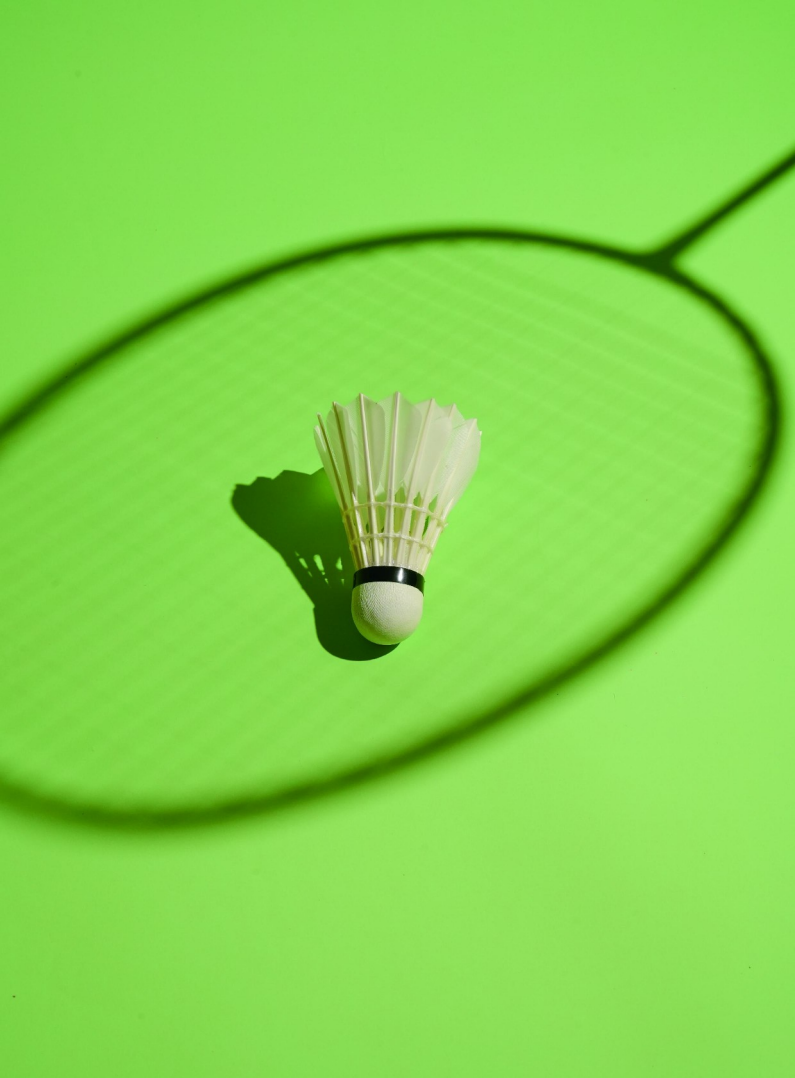

S-107

- Feather:** Nylon
Cork: Compositated cork
Quantity: 6pcs/tube
Application: Amateur training

S-300II

- Feather:** Nylon
Cork: Dual-layer cork
Quantity: 6pcs/tube
Application: Amateur training

KB-366

Square Bag

Color: White/purple(A); White/black(B); Black(C)

Material: PU+Thermal protective coating

Size: 75*20*34cm

Function:   

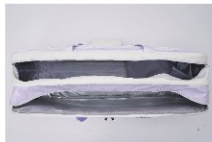

A

B

C

Product features:

- ◆ Portable function
- ◆ A separate shoe compartment
- ◆ Aluminum foil thermal insulation layer
- ◆ With KUMPOO special fabric inside the bag

A

KB-326

Backpack

Color: White/purple(A); White/black(B)

Material: Synthetic leather

Size: 47*16*36cm

Function:    

B

Product features:

- ◆ Portable function
- ◆ A separate shoe compartment and racket compartment
- ◆ With KUMPOO special fabric inside the bag

KB-329

Backpack

Color: Fluorescent yellow/army green**Material:** Synthetic leather+Fabric**Size:** 30*15*46cm**Function:**     

Product features:

- ◆ Made of PU, waterproof and wear-resistant ◆ Flip opening design with larger capacity, convenient and practical
- ◆ Multifunctional front bags and a separate compartment for racket ◆ For daily needs like business trip, leisure, travel and commute
- ◆ A combination of bright colors, stylish and eye-catching

A

KB-423

Backpack

Color: Silver(A), Black(B)

Material: Synthetic leather+Fabric

Size: 30*15*46cm

Function:     

B

Product features:

- ◆ Made of laser PU matching, unique and cool
- ◆ Wear-resistant and waterproof
- ◆ Multi functional front pockets, separate racket compartment, a separate shuttle pocket and a shoe compartment
- ◆ Apply auto lock zipper in racket compartment

A

KB-413

Leisure Bag

Color: Blue(A); Silver(B)

Material: Tyvek+Canvas

Size: 44*14.5*34cm

Function:  

B

Product features:

- ◆ Made of environment-friendly material--tyvek, wear-resistant and waterproof
- ◆ Separate compartment for racket with Velcro band to "fix" it
- ◆ Use KUMPOO logo as a design element, conspicuous and fashionable

A

KB-369

Square Bag

Color: Orange(A); Black(B)

Material: Synthetic leather+Fabric

Size: 68*30*19cm

Function:   

B

Product features:

- ◆ Made of PU, waterproof and wear-resistant
- ◆ Multifunctional front bags, separate compartments for racket and shoes
- ◆ A detachable side bag, can be used as a leisure bag, convenient to carry
- ◆ Glossy logos with subtle patterned accents add a touch of simplicity and fashion to the overall design
- ◆ Newly upgraded magnetic handle automatically snaps together

A

KB-523

Kid's Backpack

Color: Blue/orange(A); Purple/green(B)

Material: Fabric

Size: 29*16*40cm

Function:     

Arrival time: February 2025

B

Product features:

- ◆ Made of 900D fabric as the main material, combined with synthetic leather ◆ With separate compartments for racket and shoes
- ◆ Bright colors to highlight individuality ◆ Detachable Q dog Velcro patch, cute and funny
- ◆ Large capacity and bags with zippers to meet the needs of children's badminton activities, school use, outdoor outings, etc.
- ◆ The cute cotton-padded handle with an embroidered logo, soft and comfortable

KB-582

Tennis Bag

Color: White/blue(A); White/brown(B)

Material: Synthetic leather+Fabric

Size: 72*21*32cm

Function:   

Arrival time: February 2025

Product features:

- ◆ Made of embossed quilted fabric with a soft touch, a glossy surface, and a strong three-dimensional effect
- ◆ Large capacity with a main compartment, a paddle compartment, external bags with zipper and a separate shoe compartment
- ◆ Can be carried by hand or over one shoulder

A

KB-581

Tennis Bag

Color: White/blue(A); White/brown(B)

Material: Synthetic leather+Fabric

Size: 45*15*35cm (Mini bag: 40*29*3cm)

Function:    

Arrival time: February 2025

B

Product features:

- ◆ Made of embossed quilted fabric with a soft touch, a glossy surface, and a strong three-dimensional effect
- ◆ Detachable bag for pickleball paddle, convenient to carry
- ◆ Can be carried by hand or over one shoulder
- ◆ A separate shoe compartment and a multifunctional pocket on the back for convenient storage

A

B

C

KB-551

Pickleball Backpack

Color: Purple/black(A); White/blue(B); Black(C)

Material: Synthetic leather+Fabric

Size: 29*14*48cm

Function:      

Arrival time: February 2025

Product features:

- ◆ Made of synthetic leather, wear-resistant ◆ With multifunctional front pockets for accessories
- ◆ Pickleball paddle compartment with Velcro straps to enhance paddle protection
- ◆ Dedicated ball tube storage bag and separate shoe compartment for organized storage

A

B

C

KB-541

Pickleball Bag

Color: White/purple(A); White/blue(B); White/black(C)

Material: Synthetic leather+Fabric

Size: 46*17*32cm (Mini bag: 30*23*2cm)

Function:   

Arrival time: February 2025

Product features:

- ◆ Made of synthetic leather, wear-resistant
- ◆ Detachable bag for pickleball paddle, convenient to carry
- ◆ Separate compartment for shoes
- ◆ Can be carried by hand or over one shoulder

KB-591 Square Bag for 9 Rackets

Color: White/black(A); White/red(B); Black(C)

Material: Synthetic leather + Fabric

Size: 74*33*29cm

Function:     

Arrival time: February 2025

Product features:

- ◆ Made of toothpick textured leather and plain-grain leather, waterproof, wear-resistant and stain-resistant
- ◆ Large capacity, enough to hold 9 rackets ◆ Separate compartments for racket, shoes, apparel, etc.
- ◆ Can be carried on both shoulders or by hand ◆ A big KUMPOO logo on the front side, simple and elegant
- ◆ Front pocket with transparent PVC mesh design

KB-565

Square Bag (Comic Series)

Color: Orange(A); Purple(B); Green(C)

Material: Fabric

Size: 72*20*34cm

Function:     

Arrival time: February 2025

A

B

C

Product features:

- ◆ Take 900D fabric as the main material to make the bag structured ◆ 2D faux 3D design with vibrant color combination
- ◆ With embroidered LOGO on the front pocket, interesting and exquisite ◆ Separate compartment for rackets
- ◆ Built-in detachable dry bag, wet bag, and shoe bag for organized and orderly storage

KB-527

Backpack (Comic Series)

Color: Green(A); Purple(B); Orange(C)

Material: Fabric

Size: 33*18*45cm

Function:     

Arrival time: February 2025

A

B

C

Product features:

- ◆ Take 900D fabric as the main material to make the bag structured
- ◆ 2D faux 3D design with vibrant color combination
- ◆ Multifunctional: front pockets and separate compartments for racket and shoes
- ◆ With embroidered LOGO on the front pocket, interesting and exquisite

A

KB-564 Square Bag (Colored Ink Series)

Color: White-pink(A); White-blue(B)

Material: Synthetic leather + Fabric

Size: 74*20*32cm

Function:     

Arrival time: February 2025

B

Product features:

- ◆ Made of color ink and white synthetic leather, wear-resistant and waterproof
- ◆ Separate compartments for rocket and shoes
- ◆ Multifunctional and practical front pockets with zipper
- ◆ With phantom LOGO, stylish and edgy

A

KB-524

Backpack (Colored Ink Series)

Color: White/blue(A); White/pink(B)

Material: Fabric

Size: 32*17*50cm

Function:     

Arrival time: February 2025

B

Product features:

- ◆ Made of color ink and white synthetic leather, wear-resistant and waterproof ◆ Separate compartments for rocket and shoes
- ◆ Multifunctional and practical front pockets with zipper ◆ With phantom LOGO, stylish and edgy
- ◆ Can be carried on both shoulders or by hand

A

B

KB-576

Leisure Bag

Color: Purple(A); Black(B)

Material: Synthetic leather + Fabric

Size: 20*9*20cm(fold); 42*5*20cm(open)

Function:  

Arrival time: February 2025

Product features:

- ◆ Mini Bag, fashionable and practical
- ◆ Made of PU with toothpick texture, waterproof and wear-resistant
- ◆ Two compartments with transparent PVC cover for storing decorations like postcards and badges

A

KB-563

Square Bag

Color: Purple(A); Black(B)
Material: Synthetic leather + Fabric
Size: 73*21*32cm
Function:     

Arrival time: February 2025

B

Product features:

- ◆ Made of PU, with toothpick texture, waterproof and wear-resistant
- ◆ Multifunctional front pockets with zipper
- ◆ Detachable front pockets with transparent PVC cover
- ◆ Zippered back pocket, separate compartments for racket and shoes

A

KB-561 Square Bag for 6 Rackets

Color: White/black(A); White/blue(B)

Material: Synthetic leather + Fabric

Size: 73*20*32cm

Function:     

Arrival time: February 2025

B

Product features:

- ◆ Made of semi-silicone leather, wear-resistant, stain-resistant and flame-retardant
- ◆ Front pocket with transparent PVC mesh design
- ◆ Separate shoe compartment, clean and convenient
- ◆ Separate compartments for racket and accessories

A

KB-571

Leisure Bag

Color: Black(A); Off-white(B)

Material: Synthetic leather + Fabric

Size: 24*8*17cm

Function:   

Arrival time: February 2025

B

Product features:

- ◆ Made of PU-coated fabric, wear-resistant and waterproof ◆ Can be carried on one shoulder or crossbody
- ◆ With multifunctional Zippered front pocket and rear slip pocket ◆ Front design with cord for hanging accessories

A

KUMPOO PRODUCT CATALOG

A

B

KH-X007

Color: Khaki/white(A); White/red(B)

Upper: EVA

Sole: EVA

Size: 35-44#

Arrival time: March 2025

Features: Rigid EVA / Hyper sole

- The one-piece sole is made of EVA material, lightweight and impact-absorbing.

A

B

C

KH-J08

Color:	White/light gray (A); White/blue (B); White/Green (C)
Upper:	TPU+Mesh
Lining:	Fabric+EVA
Sole:	Natural rubber+MD+Carbon plate
Size:	31-37#

Remark: With professional shoe bag

Features: Artificial leather / Double air mesh / Anti torsion / TPU Fit / Fitgo

- The upper is made of TPU and mesh, providing flexibility, lightness, breathability, and support.
- Knob button device, adjusting the shoe elasticity is more convenient, faster.
- Carbon plate is added in the arch area, providing stable support for the sole.

A

B

C

KH-J06

Color: White(A); Black(B); White/green(C)

Upper: Microfiber+Mesh+TPU

Lining: Fabric+EVA

Sole: Natural rubber+MD+Carbon plate

Size: 31-37#

Arrival time: April 2025

Remark: With professional shoe bag

Features: Artificial leather / Double air mesh / Anti torsion / Rigid EVA / Hyper sole

- The upper is made of microfiber and mesh, providing good wear resistance, lightness and breathability.
- TPU in the shoe upper maintains support and balance.
- Carbon plate is added in the arch area, which offers the sole good support.
- Natural rubber sole with three-dimensional pattern, which is wear-resistant and anti-slip.

A

Arrival time: March 2025

Remark: With professional shoe bag

B

Features: Artificial leather / Double air mesh / Anti torsion / Supercritical midsole / Lateral wall

- Using supercritical foaming midsole technology, the overall is lighter and more textured, offering high impact resistance, excellent rebound performance, and durability.
- The upper is made of synthetic microfiber with a TPU film, providing flexibility, lightness, breathability, and support.
- The rubber outsole Features 3D carbon plates at the arch area, combined with a three-dimensional tread design for stable support and slip resistance.

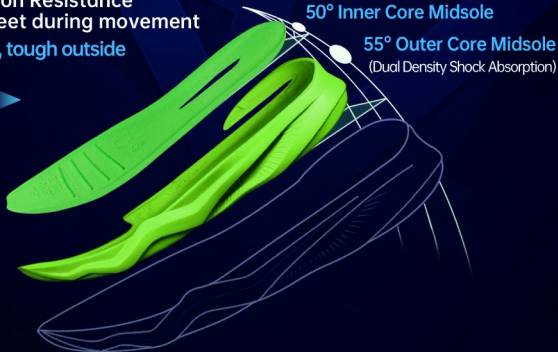

KH-G828

TAKE THE CHALLENGE

DUO
POWER

High Torsion Resistance
Support feet during movement
Soft inside, tough outside

Dual Density Shock Absorption Midsole

- > 50° Inner core midsole: offer comfortable feet feeling
- > 55° Outer core midsole: provide support and stability

Innovative Design

Dual-layer foam construction: the upper layer features soft material for shock absorption, while the lower layer utilizes firm material for support and stability.

Dual Density

Soft and comfortable while providing strong support and wrapping.

**Low density but
long-lasting rebound**
Lighter in every way

• **Eco-Friendly and Sustainable**

The supercritical foaming process eliminates the need for chemical foaming agents, reducing formamide emissions and simplifying production steps. This not only enhances efficiency but also delivers higher material quality.

• **High-Performance Energy Feedback**

The foam pore structure is fine and evenly distributed.

The material delivers over 92% energy return and up to 60% rebound performance. It efficiently absorbs impact, reducing pressure on joints and muscles during movement. The material has an energy feedback rate of over 92% and a rebound performance of up to 60%. It effectively absorbs impact and reduces stress on joints and muscles during exercise. The material better adapts to movement and landing pattern, improving overall comfort. It achieves greater elasticity at a lower density than the industry standard.

• **Long-lasting Shock Absorption and Resilience**

It offers long-lasting rebound performance with minimal decay, ensuring consistent support over time.

• **Ultra-Light Empowerment**

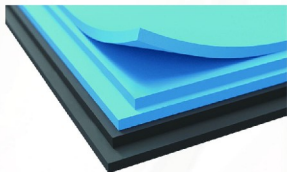

Its ultra-light design improves efficiency dramatically.

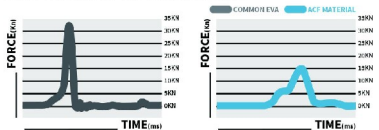

Absorbing 90% of the impact force

Mimic the function and structure of cartilage, control and adjust its micro-nano structure by physical and chemical methods, so that it is infinitely close to the three-dimensional ultra structure of cartilage, so that we invent a biomimetic material, with the same or better buffer energy absorption effect as cartilage. This material is applied to the midsole and insole of badminton shoes, it can absorb more than 90% of the impact force.

- Breakthrough cushioning materials for the 21st century

SHOCK IMPACT FROM DIFFERENT MATERIALS

*COMMON EVA

Common EVA material has a high peak force and a large drop, and the impact force quickly declines after reaching the peak, it is easy to injure human body in the force moment.

*ACF MATERIAL

The peak force of ACF is low, and the curve is gentle, reflecting that the impact force is absorbed in large quantities and the impact force is greatly reduced.

- The protecting effect of ACF

COMMON EVA

COMMON EVA

The impact of one to five times body weight is transmitted sequentially from the bottom to the top, and the knee is severely impacted and damaged.

VS

ACF MATERIAL

ACF

Most of the impact is absorbed by the ACF at the bottom of the foot and is not transmitted upwards, maximizing the protection of the knee from injury.

SHOES TECHNOLOGY

FITGO

One press and twist, quick lacing! Kumpoo introduces a fast lacing system with tightness accurate to 1mm. With simple knob adjustment the perfect fit tightness is easily achieved. Designed to be durable, the Fitgo can withstand more than 50,000 rotations and pulls of more than 30 kg to ensure long-term reliability.

DUO POWER

The finer the structure, the more delicate the foot feeling! The unique layered design of the DUO POWER has two layers of mid-sole, each with a different density. The outer mid-sole is hard for support and protection; the inner mid-sole is soft for cushioning and comfort.

LEOBOOM MIDSOLE

The LEOBOOM MIDSOLE is created by pressurizing and heating the ETPU material to mimic the state of a cell when it divides. This mid-sole has unparalleled light weight and cushioning performance, and players can feel the explosive power and flexibility of cell division when wearing it.

MUSCLE PILLAR

A supporting anti-torsion structure placed on the outsole, inspired by the structure and function of human muscles. The hardness of the muscle pillar is extremely high, even beyond the traditional carbon plate, injecting excellent stability into the badminton shoes. It is specially designed for the arch of the foot, this support structure not only strengthens the arch, but also provides excellent torsion resistance, providing reliable support and sense of safety for the player during every step of the movement.

ACF ARTIFICIAL CARTILAGE FOAM

Mimic the function and structure of cartilage control and adjust its micro-nano structure by physical and chemical methods, so that it is infinitely close to the three-dimensional ultra structure of cartilage, so that we invent a biomimetic material, with the same or better buffer energy absorption effect as cartilage. This innovative material is applied to the midsole and insole of badminton shoes, it can absorb more than 90% of the impact force providing cushioning performance as cartilage.

UHMWPE MATERIAL

Inspired by the bionic structure of silkworm cocoons, this technology uses world-class yarn made from ultra-high molecular weight polyethylene (UHMWPE), offering 2.6 times the elasticity of traditional polyester and 12% lighter than conventional Mono yarn. The eco-friendly weaving process breaks away from traditional warp and weft bindings, and the entire process is glue-free, combining the silkworm cocoon-inspired structure for enhanced performance.

SUPERCRITICAL FOAMING MIDSOLE

It adopts supercritical foaming moulding technology, creates a finely structured, uniform foam with tiny, consistent pores. It is lightweight yet high quality. During movement, it offers over 92% energy feedback, with a rebound performance up to 60%, ensuring durability and wear resistance.

MC77

Arrival time: April 2025

Frame material: Full carbon fiber
 Shaft material: Full carbon fiber
 Weight/Grip: 4U/G5
 Tension: <28LBS
 Color: Green

Perfect balance point, large sweet area.

Flannelette Bag

MC88

Arrival time: April 2025

Frame material: Full carbon fiber
 Shaft material: Full carbon fiber
 Weight/Grip: 4U/G5
 Tension: <28LBS
 Color: Brown

Perfect balance point, large sweet area.

JUNIOR SERIES

NEW

POPPING CANDY

Arrival time: February 2025

Frame material: Carbon fiber+Resin

Shaft material: Carbon fiber+Resin

Weight/Grip: 6U/G6

Tension: ≤24LBS

Color: Yellow, Blue

60cm length and lightweight experience, specially designed for children.

JUNIOR SERIES

520B (S)

Frame material: Carbon fiber+Resin
 Shaft material: Carbon fiber+Resin
 Weight/Grip: 4U/65
 Tension: ± 24 LB
 Color: Black/purple, Black/blue

Racket Bag

Out of twelve rackets suitable for beginners

JUNIOR SERIES

520A (S)

Frame material: Carbon fiber+Resin

Shaft material: Carbon fiber+Resin

Weight/Grip: 4U/65

Tension: ≤24LBS

Color: White/red, White/yellow

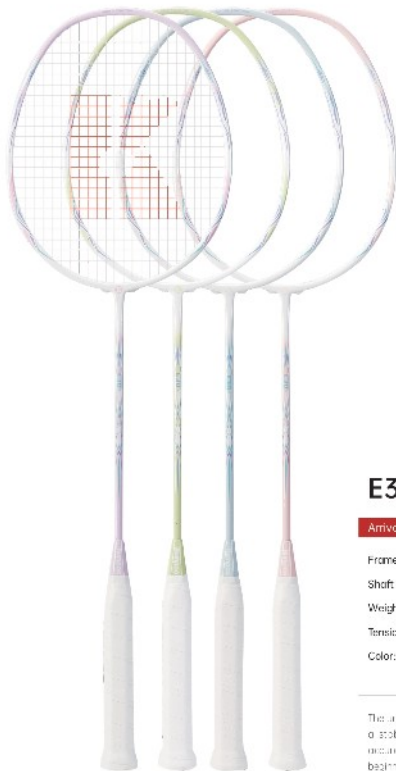

Flannelette Bag

One of the best rackets suitable for beginners

CARBON COMPOSITES SERIES

NEW

E30

Arrival time: February 2025

Frame material: 6061 Aluminum

Shaft material: Carbon fiber+Resin

Weight/Grip: 500G5

Tension: <24LBS

Color: Light purple, Light green,
Light blue, Light pink

Bag

The unique square head design and the stable frame structure, enhancing shot accuracy, making it an excellent choice for beginners.

SUPERLIGHT SERIES

RIDE THE WIND S (4U)

Frame material:	High strength carbon fiber
Shaft material:	Full carbon fiber
Weight/Grip:	4U/SS
Tension:	<30LBS
Color:	White, Gray, Blue

All round lightweight racket offers smooth and stable control.

RIDE THE WIND S (6U)

Frame material:	High strength carbon fiber
Shaft material:	Carbon fiber + Kevlar
Weight/Grip:	6U/SS
Tension:	<30LBS
Color:	Green

Lightweight strikes, swift response.

SUPERLIGHT SERIES

Flannelette Bag

Flannelette Bag

Flannelette Bag

WHITE DEW

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 5U/66
 Tension: <30LBS
 Color: White/pink

Light weight with large sweet area, suitable for beginners.

PEACH BLOSSOM

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 5U/66
 Tension: <30LBS
 Color: White/pink

Light weight with large sweet area, suitable for beginners.

BLUE DOME

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 5U/66
 Tension: <30LBS
 Color: White/purple

Light weight with large sweet area, suitable for beginners.

SUPERLIGHT SERIES

DREAM

Arrival time: March 2025

Frame material: High strength carbon fiber

Shaft material: High strength carbon fiber

Weight/Grip: 5U/G6

Tension: ≤60LBS

Color: White, Pink

Flanellette Bag

High quality full carbon fiber delivers exceptional power and durability. The apical point shines vertically on the light change.

SUPERLIGHT SERIES

LORIE 10

Arrival time: March 2025

Frame material: Full carbon fiber

Shaft material: Full carbon fiber

Weight/Grip: 5U/G4

Tension: ≤ 30 LBS

Color: Blue/Pink

Flannelette Bag

High weight for high elasticity expanded sweet area, ideal for beginners and female players.

QINGFENG SERIES

QF-12

Arrival time: March 2025

Frame material: Full carbon fiber

Shaft material: Full carbon fiber

Weight/Grip: 4U/G5

Tension: ≤ 28 LBS

Color: Silver/grey; Silver/pink

Easy to master and control, ideal for beginners.

QF-13

Arrival time: March 2025

Frame material: Full carbon fiber

Shaft material: Full carbon fiber

Weight/Grip: 4U/G5

Tension: ≤ 28 LBS

Color: Pink; Blue

Easy to master and control, ideal for beginners.

QINGFENG SERIES

QF-10

Arrival time: March 2025

Frame material: Full carbon fiber
 Shaft material: Full carbon fiber
 Weight/Grip: 5U/G5
 Tension: ≤ 30 LBS
 Color: White/blue; White/purple; White/green

Ultra-light weight for agile offense, ideal for beginners and advanced players.

QF-11

Arrival time: March 2025

Frame material: Full carbon fiber
 Shaft material: Full carbon fiber
 Weight/Grip: 4U/G5
 Tension: ≤ 28 LBS
 Color: Pink; Blue

Easy to maneuver and control, ideal for beginners.

CULTURAL SERIES

Flannelette Bag

Flannelette Bag

Flannelette Bag

WINTERSWEET

Frame material:	High strength carbon fiber
Shaft material:	High strength carbon fiber
Weight/Grip:	4U/OS
Tension:	250LBS
Color:	Black/white

The 4.9mm flexible shaft is easy to master, making it ideal for beginner and intermediate players.

LUSH MOUNTAIN

Frame material:	High strength carbon fiber
Shaft material:	High strength carbon fiber
Weight/Grip:	4U/OS
Tension:	250LBS
Color:	White/green, White

6.9mm shaft offers a fast rebound, ideal for advanced and intermediate players.

SOUTH

Frame material:	High strength carbon fiber
Shaft material:	High strength carbon fiber
Weight/Grip:	4U/OS
Tension:	250LBS
Color:	White/green

Flex frame provides good stability and control, ideal for beginner and advanced players.

CULTURAL SERIES

NW

Harnelette Bag

PINES II

Arrival time: February 2025

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 4U/G5
 Tension: ± 32 LBS
 Color: White/blue, White/pink

Upgraded materials, enhanced performance, higher string tension, featuring a 6.8mm shaft, delivering fast drives and powerful smashes.

Harnelette Bag

PINES

Frame material: High modulus carbon fiber
 Shaft material: High modulus carbon fiber
 Weight/Grip: 4U/G5
 Tension: ± 33 LBS
 Color: White/blue

Well-suited for both offense and defense, ideal for beginner to intermediate players.

CULTURAL SERIES

JINGZHOU

Arrival time: February 2025

Frame material: High strength carbon fiber

Shaft material: High strength carbon fiber

Weight/Grip: 4U/G5

Tension: ≤50LBS

Color: Light green

Hornelette Bag

The shaft delivers quick and agile responses, while the box frame ensures stability and control. Suitable for all round players.

CULTURAL SERIES

YANGZHOU

Arrival time: February 2025

Frame material: High strength carbon fiber

Shaft material: High strength carbon fiber

Weight/Grip: 4U/G5

Tension: ≤30LBS

Color: Green

Flannelette Bag

The shaft delivers quick and agile responses, while the cock frame ensures stability and control, suitable for all-around players.

SPECIAL MATERIAL--LUMINOUS COATING

FLIP

Frame material:	High strength carbon fiber
Shaft material:	30T High modulus carbon fiber
Weight/Grip:	400G5
Tension:	<52LBS
Color:	White

6.8mm slim flexible shaft with excellent power transmission, combined with T700 max frame for stability and easy handling. Features a special luminous coating, ideal for intermediate and advanced players.

Bag

KEVLARMOR

KEVLARMOR III

Frame material: High modulus carbon fiber+Kevlar

Shaft material: High modulus carbon fiber

Weight/Grip: 4U/65

Tension: <35LBS

Color: Gold

The frame integrates Kevlar material to enhance stability and improve stability of the frame. The flexible shaft is made of TORAY carbon fiber to boost hitting speed. Designed for intermediate to advanced players, this racket is also exclusive racket for long life.

Bag

EQUIPMENT FOR TIAN HOUWEI

Bag

HOUYI III

Arrival time: May 2025

Frame material:	T800 High modulus carbon fiber+ Graphene+Nano-Resin
Shaft material:	High modulus carbon fiber+Built-in titanium wire
Weight/Grip:	4U/65
Tension:	<55LBS
Color:	Gold

It has unstoppable attack and improved speed. Made of TORAY carbon fiber, the nano-fibrane has been utilized to provide with speed and stability.

Bag

HOUYI II

Frame material:	T800 High modulus carbon fiber+Graphene
Shaft material:	High modulus carbon fiber+Built-in titanium wire
Weight/Grip:	4U/65
Tension:	≤55LBS
Color:	White/blue

Faster speed, stronger attack, built-in titanium wire and sword frame make it steady at all times, suitable for speed players.

HD441
III

Exclusive Racket for Tion Houwei

- ▶ 1300 High Modulus Carbon Fiber Nano Resin
- ▶ High Shocked Carbon Cloth Composite
- ▶ Graphene Technology

◀ Built-in Titanium Wire Shaft

BUILT IN TITANIUM

DUAL SHAFT CORES

Bag

TWIN-ENGINE II

Arrival time: To be confirmed

Frame material: T800 High modulus carbon fiber+Inner foaming+Nano Resin

Shaft material: High modulus carbon fiber+Energy core

Weight/Grip: 4U/CS

Tension: <32LBS

Color: Purple

The combination of T800 carbon fiber and Nano Resin improves the anti-deformation ability and durability.

Bag

TWIN-ENGINE

Frame material: T700 High modulus carbon fiber+Inner foaming

Shaft material: High modulus carbon fiber+Energy core

Weight/Grip: 4U/CS

Tension: <32LBS

Color: White; Black

Energy cored shaft technology creates a strong dual shaft cores, offering different control and swing power suitable for high-level and professional players.

TWIN-ENGINE-II

- ▶ T800 High Modulus Carbon Fiber + Nano Resin
- ▶ Energy Collecting and Balance System
- ▶ Shock Absorption System

Energy Cored Shaft ▶

ASURA II

Arrival time: To be confirmed

Frame material:	New High modulus carbon fiber+Inner foaming+Nano-Resin
Shaft material:	M50 High modulus carbon fiber+Super fine solid shaft
Weight/Grip:	4U/65
Tension:	≤52LBS
Color:	Red

Unleash unstoppable power with aggressive offense. It features new generation M50 carbon yarn combined with High Strength Carbon Fiber Composite technology, redefining the aesthetics of powerful attack.

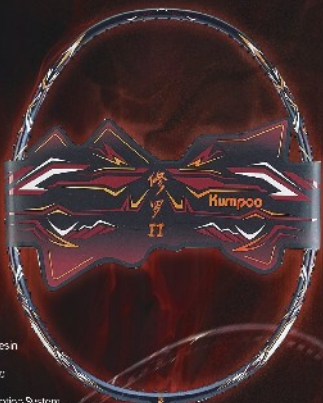

Bag

ASURA

Frame material:	New High modulus carbon fiber+Inner foaming+Nano-Resin
Shaft material:	M50 High modulus carbon fiber+Super fine solid shaft
Weight/Grip:	4U/65
Tension:	≤52LBS
Color:	White/red, White/blue

Born for power offense, 6.2mm super fine solid shaft delivers assured power for million of times.

ASURA II

Super Fine Solid Shaft ▶

- ▶ High Modulus Carbon Fiber + Nano Resin
- ▶ High Stacked Carbon Glass Composite
- ▶ High Composite Density Shock Absorption System

SUPERFINE
SHAFT

BUILT-IN TITANIUM WIRE

MADE IN TITANIUM

Known as the metal of the future, titanium has the advantages of light weight and high strength. Combined with super high modulus carbon yarn, three memory titanium wire improves the rebound speed of the shaft and anti-torsion performance of the racket.

WOVEN MANUFACTURING

Woven fiber manufacturing is a high-tech technology process used in high-end badminton rackets. Woven has excellent stability and maintains its best status while hitting, creating rich patterns and beautiful embroidery.

PLIERS TECH

By applying 3K carbon cloth, Kumboo develops a new patented cap, which fastens the shaft tightly. Compared with traditional rackets, the load stress of shafts is reduced by 25%. The cap fastens the shaft tightly without any wobble and the anti-torsion of shafts increases greatly.

Patent No. ZL202220048613.8

PLIERS TECH PRO

The flat cap is upgraded into a unique shape, which provides a better rebound ability for the shaft. Instead of 3K carbon cloth, 1K carbon cloth has a denser texture. That is to say, it is graded with a denser of stripes, which improve firmness between the cap and handle.

CARBON HANDLE

Compared with traditional wooden handle, carbon handle is lighter, tighter, more durable and not easy to crack by sweat. Carbon handle also provides good control and a comfortable feeling to the player.

CHAMELEON PAINT

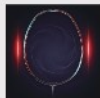

A special material that can change into different colors under various lights and angles.

INNER FOAMING SHAFT

Through inner PU foaming technology, it breaks through the limitations of traditional heat shrinking, making the internal structure of the carbon fiber smoother. This advances torsional resistance by 10%, allowing for smoother power transfer and more stable performance. The PU foam material attached to the inner significantly reduces vibration feedback to the hand.

RACKETS TECHNOLOGY

SPIRAL FRAME

The inner and outer sides of the frame form opposite bend sections, giving the head frame a strong area of flex and reducing all resistance. The racket frame adopts a concave/convex design at the 3 and 9 o'clock, aiming to reduce wind resistance and increase swing speed. The inverted bridge design is also placed between 3 and 9 o'clock, providing a more stable structure for the racket frame and ensuring stability during the swing.

KEVLAR MATERIAL

Kevlar is a strong synthetic fiber that is commonly used in body armor. Karpoo first applied kevlar to the racket by combining it with carbon fiber to provide higher strength to the frame. The woven kevlar around the middle frame collapses easily and provides more powerful hitting.

GRAPHENE FRAME

Involving the strength of Graphene, Graphene protection technology effectively enhances the frame by incorporating molecular patterns of carbon fiber and Graphene. This technology makes lightweight racket bear high pressure.

SHOCK ABSORPTION SYSTEM

By using a special process, polyurethane foam is built into the racket frame and changes into a spongy structure after high temperature and cooling down. It absorbs shock, reduces uncomfortable feelings in arms and improves hitting comfort.

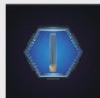

ENERGY COLLECTING AND BALANCE SYSTEM

Located at 3 and 9 o'clock of the frame, precisely controls twist, suppresses racket surface shaking, and enhances racket vibration performance, allowing players to hit back faster, more accurately, and more stably during the second swing.

SUPER FINE SHAFT

Rampage shafts vary from 5.8mm and 5.9mm to 6.0mm and 6.1mm. And 6.0mm shaft creates a more flexible and easier hitting experience for the players.

HEXAGON SHAFT

Changing the shaft from a normal round to a hexagonal shape reduces the front grip bulging before and during platform use and a more accurate drop point. It can also make the shaft rebound faster and offer the player a quicker reaction.

Patent No: ZL200820201080.7

ENERGY CORED SHAFT

The technology is to involve the specially processed core materials that will not easily deform and shift. It can absorb shocks from the frame and then improve the tracking.

Patent No: ZL202320834705.8

TAKE THE CHALLENGE

2025 KUMPOO PRODUCT CATALOG

TAKE THE CHALLENGE

This is more than just the slogan of Kumpoo, it is also the essence of brand culture. With full confidence and passion, Kumpoo people will create a century-old enterprise and a long-lasting brand with rigorous and pragmatic development concept.

With persistent and innovative spirit of striving, with the business purpose of integrity services, we will depict the brilliant take-off tomorrow for Kumpoo!

GLOBAL STRATEGIC

DISTRIBUTION MAP

TECHNOLOGICAL INNOVATION

RACKET TECHNOLOGY

EAN ANTI-FAKE TECH

Built-in unique IC chip and a bottom cap, making it more difficult to replicate or tamper, offering near absolute and counterfeit protection. Take out the chip and use RAL function to verify its authenticity.

GOLF SHAFT

Kumpo cooperated with FUJIKURA which was the most professional golf shaft manufacturer in Japan of badminton shafts. It can adjust the bending point of hitting effectively by keeping the same inner and external diameter of the shaft to satisfy the diverse demand of players.

HEXAGON SHAFT

It enhances the flex point of the shaft for quick rebound. The T-joint is optimized with a hexacted hexagon structure, strengthening the torsional resistance at the bottom of shaft, reducing the coloration angle by 7.2% compared to traditional radials.

Patent No. ZL200620201060.7

DUAL STIFFNESS PATENT SHAFT

It makes a racket offensive and defensive. There are two different stiffness on both sides of the shaft, offering distinctly different hitting sensations.

Patent No. ZL201420364704.2

10U-TOP LIGHT RACKET IN THE WORLD

44g, as light as an egg, but the tension can withstand up to 30LBS.

Patent No. ZL201922555792.5

KEVLAR MATERIAL

Bulldozer Blade-Gelco was used in the racket frame, making it bulletproof and high-strength. This glass-reinforced carbon fiber can withstand higher tension, making it a truly bulletproof and armor-like racket.

GRAPHENE TECHNOLOGY

Using the stable carbon particles and high-strength carbon fibers on the frame, resulting in a powerful and stable 1000 years' carbon fiber racket, can easily withstand 35LBS with excellent anti-tension.

PLIERS TECHNOLOGY

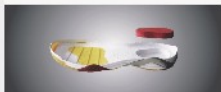

Innovative 64 carbon cap has more excellent strength and stiffness. The load area of the cap and shaft has increased by 25% while the anti-tension increased by 40%, making the racket more stable and accurate.

Patent No. ZL202220048613.0

SHOES TECHNOLOGY

LIGHT PROFESSIONAL BADMINTON SHOES

Kumpoo developed shoes 99-100 in 2009. The new CBS functional rubber and counter-bolding system made the shoes become the lightest in the market.

KPU MATERIAL

Kumpoo was the first to use KPU material in professional badminton shoes, which enhances the wear resistance, stability and anti-deformation as well as extends the comfort life.

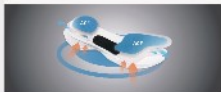

LEOBOOM MIDSOLE

As ETPU particles expand rapidly under high temperature and pressure, the unique "Leoboom" midsole is formed. By using the midsole, the shoe body is light and full, or power players can experience the explosiveness and agility of collection.

ACF ARTIFICIAL TECHNOLOGY

Inspired by the structure of cartilage, ACF technology controls micro-movements, making it absorb 90% of impact into the insole.

MUSCLE PILLAR

Inspired by the structure and function of human muscles, the built-in "muscle pillar" provides exceptional stiffness and greater support to the shoes. Built into the arch, it optimizes dynamic torsional resistance, offering the most stable platform during movement.

DUO POWER MIDSOLE

The unique design of the DUO POWER midsole features two layers, each with different densities and functions. The outer midsole is designed to be firm, providing solid support and excellent protection, while the inner midsole is softer, offering exceptional cushioning and comfort.

RACKETS SERIES

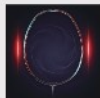

KUMPOO PRODUCT CATALOG

RACKETS SERIES

RACKETS TECHNOLOGY

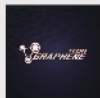

SPIRAL FRAME

The inner and outer sides of the frame form opposite directions, giving the head frame a strong area of fixed feel and reducing vibration. The racket frame adopts a concave/convex spiral design at 3 and 9 o'clock, aiming to reduce wind resistance and increase swing speed. The inverted bridge design is also placed between 3 and 9 o'clock, providing a more stable structure for the racket frame and ensuring stability during the swing.

KEVLAR MATERIAL

Kevlar is a strong synthetic fiber that is commonly used in body armor. Karpoo first applied kevlar to the racket by combining it with carbon fiber to provide higher strength to the frame. The woven kevlar around the middle frame collapses easily and provides more powerful hitting.

GRAPHENE FRAME

Involving the strength of Graphene, Graphene protection technology effectively enhances the frame by incorporating molecular patterns of carbon fiber and Graphene. This technology makes lightweight racket bear high pressure.

SHOCK ABSORPTION SYSTEM

By using a special process, polyurethane foam is built into the racket frame and changes into a spongy structure after high temperature and cooling down. It absorbs shock, reduces uncomfortable feelings in arms and improves hitting comfort.

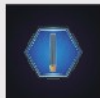

ENERGY COLLECTING AND BALANCE SYSTEM

Located at 3 and 9 o'clock of the frame, precisely controls racket, suppresses racket surface shaking, and enhances racket vibration performance, allowing players to hit back faster, more accurately, and more stably during the second swing.

SUPER FINE SHAFT

Rampage shafts vary from 5.8mm and 5.9mm to 6.0mm and 6.1mm. And 6.0mm shaft creates a more flexible and easier hitting experience for the players.

HEXAGON SHAFT

Changing the shaft from a normal round to a hexagonal shape reduces the front grip bulging before and during platform use and a more accurate drop point. It can also make the shaft rebound faster and after the player's quicker reaction.

Patent No: ZL200820201080.7

ENERGY CORED SHAFT

The technology is to involve the specially processed core materials that are coated with additional shaft. It can absorb shocks from the frame and then improve the racket feeling.

Patent No: ZL202320834705.8

BUILT-IN TITANIUM WIRE

Known as the metal of the future, titanium has the advantages of light weight and high strength. Combined with super high modulus carbon yarn, three memory titanium wire improves the rebound speed of the shaft and anti-torsion performance of the racket.

WOVEN MANUFACTURING

Woven fabric manufacturing is a high-tech technology process used in high-end badminton rackets. Woven has excellent stability and maintains its best status while hitting, creating rich patterns and beautiful embroidery.

PLIERS TECH

By applying 3K carbon cloth, Kumboo develops a new patented cap, which fastens the shaft tightly. Compared with traditional rackets, the load stress of shafts is reduced by 25%. The cap fastens the shaft tightly without any wobble and the anti-torsion of shafts increases greatly.

Patent No. ZL202220048613.8

PLIERS TECH PRO

The flat cap is upgraded into a unique shape, which provides a better rebound ability for the shaft. Instead of 3K carbon cloth, 1K carbon cloth has a denser texture. That is also equipped with grid cloth and carbon stripes, which improve firmness between the cap and handle.

CARBON HANDLE

Compared with traditional wooden handle, carbon handle is lighter, tighter, more durable and not easy to crack by sweat. Carbon handle also provides good control and a comfortable feeling to the player.

CHAMELEON PAINT

A special material that can change into different colors under various lights and angles.

INNER FOAMING SHAFT

Through inner PU foaming technology, it breaks through the limitations of traditional heat shrinking, making the internal structure of the carbon fiber smoother. This enhances torsional resistance by 10%, allowing for smoother power transfer and more stable performance. The PU foam material attached to the inner significantly reduces vibration feedback to the hand.

ASURA II

Super Fine Solid Shaft ▶

- ▶ High Modulus Carbon Fiber + Nano Resin
- ▶ High Stacked Carbon Glass Composite
- ▶ High Composite Density Shock Absorption System

SUPERFINE
SHAFT

SUPERFINE
S H A F T

Bag

ASURA II

Arrival time: To be confirmed

Frame material:	New High modulus carbon fiber+Inner foaming+Nano-Resin
Shaft material:	M50 High modulus carbon fiber+Super fine solid shaft
Weight/Grip:	4U/65
Tension:	≤52LBS
Color:	Red

Unleash unstoppable power with aggressive offense. It features new generation M50 carbon yarn combined with High Strength Carbon Fiber Composite technology, redefining the aesthetics of powerful attack.

Bag

ASURA

Frame material:	New High modulus carbon fiber+Inner foaming+Nano-Resin
Shaft material:	M50 High modulus carbon fiber+Super fine solid shaft
Weight/Grip:	4U/65
Tension:	≤52LBS
Color:	White/red, White/blue

Born for power offense, 6.2mm super fine solid shaft delivers assured power for million of times.

- ▶ New High Modulus Carbon Fiber
- ▶ Scalp Carbon Cloth
- ▶ Withstands: 32 LBS

FELI CITY

瑞麟

LIMITED GIFT BOX OF SNAKE YEAR 2025

FELICITY (Gift Box)

Frame material: High strength+high elastic carbon fiber

Shaft material: New high modulus carbon fiber

Weight/Grip: 4U/G5

Tension: <32LBS

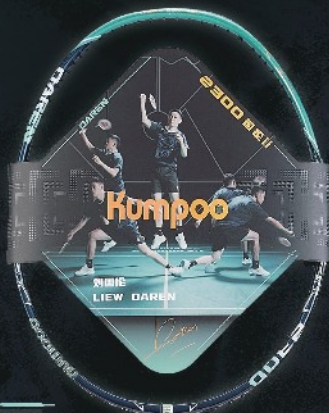

Color: Purple

Gift Box

innovative scale carbon cloth design offer great control and torsion and
responsive rebound system, which makes it suitable for middle and
high level players.

2300 DAREN II

Exclusive Racket for LIEW DAREN

- ▶ High Modulus Carbon Fiber + Nano Resin
- ▶ High Stacked Carbon Cloth Composite
- ▶ Dual Frame Shapes
- ▶ Withstands 35LBS

HEXAGON SHAFT

HEXAGON

Patent No: ZL200820201080.7

HEXAGON

Patent No.: ZL200820201080.7

Bag

2300 DAREN II

Arrival time: February 2025

Frame material: High strength carbon fiber+Nano-Resin

Shaft material: High strength carbon fiber+Nano-Resin

Weight/Grip: 4U/G5

Tension: <55LBS

Color: Blue

Reinforced head has been shifted forward to further enhance of strike performance, making HEXAGON synonymous with relentless attacking power.

Bag

2300 DAREN

Frame material: High modulus carbon fiber

Shaft material: High modulus carbon fiber

Weight/Grip: 4U/G5

Tension: <55LBS

Color: Blue

Equipped with "HEXAGON head", the racket has a flexible shaft and stable control performance.

CLASSIC REDUX

2900 II GOLD

Used by former An Hui Provincial Team

- ▶ Golf shaft + HEXAGON
- ▶ High Modulus Carbon Fiber + Nano-Resin
- ▶ High Stacked Carbon Cloth Composite
- ▶ Sword frame
- ▶ Withstands 35LBS

HEXAGON

DUAL SHAFT CORES

Bag

Bag

TWIN-ENGINE II

Arrival time: To be confirmed

Frame material: T800 High modulus carbon fiber+Inner foaming+Nano Resin

Shaft material: High modulus carbon fiber+Energy core

Weight/Grip: 4U/CS

Tension: <32LBS

Color: Purple

The combination of T800 carbon fiber and Nano Resin improves the anti-deformation ability and durability.

TWIN-ENGINE

Frame material: T700 High modulus carbon fiber+Inner foaming

Shaft material: High modulus carbon fiber+Energy core

Weight/Grip: 4U/CS

Tension: <32LBS

Color: White; Black

Energy cored shaft technology creates a strong dual shaft cores, offering different control and swing power suitable for high-level and professional players.

HD441
III

Exclusive Racket for Tion Houwei

- ▶ 1300 High Modulus Carbon Fiber Nano Resin
- ▶ High Shocked Carbon Cloth Composite
- ▶ Graphene Technology

◀ Built-in Titanium Wire Shaft

BUILT IN TITANIUM

EQUIPMENT FOR TIAN HOUWEI

Bag

HOUYI III

Arrival time: May 2025

Frame material:	T800 High modulus carbon fiber+ Graphene+Nano-Resin
Shaft material:	High modulus carbon fiber+Built-in titanium wire
Weight/Grip:	4U/65
Tension:	<55LBS
Color:	Gold

It has unstoppable attack and improved speed. Made of T800 carbon fiber, the nano-graphene resin can increase the power and speed and stability.

Bag

HOUYI II

Frame material:	T800 High modulus carbon fiber+Graphene
Shaft material:	High modulus carbon fiber+Built-in titanium wire
Weight/Grip:	4U/65
Tension:	<55LBS
Color:	White/blue

Faster speed, stronger attack, built-in titanium wire and sword frame make it steady at the base, suitable for speed players.

KEVLARMOR

KEVLARMOR III

Frame material: High modulus carbon fiber+Kevlar

Shaft material: High modulus carbon fiber

Weight/Grip: 4U/65

Tension: <35LBS

Color: Gold

The frame integrates Kevlar material to enhance stability and improve stability of the frame. The flexible shaft is made of TCSM carbon fiber to boost hitting speed. Designed for intermediate to advanced players, this racket is also exclusive racket for long life.

Bag

SPECIAL MATERIAL--LUMINOUS COATING

FLIP

Frame material:	High strength carbon fiber
Shaft material:	30T High modulus carbon fiber
Weight/Grip:	400G5
Tension:	<52LBS
Color:	White

6.8mm slim flexible shaft with excellent power transmission, combined with T700 max frame for stability and easy handling. Features a special luminous coating, ideal for intermediate and advanced players.

Bag

CULTURAL SERIES

YANGZHOU

Arrival time: February 2025

Frame material: High strength carbon fiber

Shaft material: High strength carbon fiber

Weight/Grip: 4U/G5

Tension: ≤30LBS

Color: Green

Flannelette Bag

The shaft delivers quick and agile responses, while the cock frame ensures stability and control, suitable for all-around players.

CULTURAL SERIES

JINGZHOU

Arrival time: February 2025

Frame material: High strength carbon fiber

Shaft material: High strength carbon fiber

Weight/Grip: 4U/G5

Tension: ≤50LBS

Color: Light green

Hornelette Bag

The shaft delivers quick and agile responses, while the box frame ensures stability and control. Suitable for all round players.

CULTURAL SERIES

NW

Harnelette Bag

PINES II

Arrival time: February 2025

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 4U/G5
 Tension: ± 32 LBS
 Color: White/blue, White/pink

Upgraded materials, enhanced performance, higher string tension. Featuring a 6.8mm shaft, delivering fast drives and powerful smashes.

Harnelette Bag

PINES

Frame material: High modulus carbon fiber
 Shaft material: High modulus carbon fiber
 Weight/Grip: 4U/G5
 Tension: ± 30 LBS
 Color: White/blue

Well-suited for both offense and defense, ideal for beginner to intermediate players.

CULTURAL SERIES

Flannelette Bag

Flannelette Bag

WINTERSWEET

Frame material:	High strength carbon fiber
Shaft material:	High strength carbon fiber
Weight/Grip:	4U/OS
Tension:	250LBS
Color:	Black/white

The 4 frame flexible and it is easy to master, making it ideal for beginner and intermediate players.

LUSH MOUNTAIN

Frame material:	High strength carbon fiber
Shaft material:	High strength carbon fiber
Weight/Grip:	4U/OS
Tension:	250LBS
Color:	White/green, White

6.0mm shaft offers a fast rebound ideal for advanced and intermediate players.

SOUTH

Frame material:	High strength carbon fiber
Shaft material:	High strength carbon fiber
Weight/Grip:	4U/OS
Tension:	250LBS
Color:	White/green

Box frame provides good stability and control ideal for beginner and advanced players.

QINGFENG SERIES

QF-10

Arrival time: March 2025

Frame material: Full carbon fiber
 Shaft material: Full carbon fiber
 Weight/Grip: 5U/G5
 Tension: ≤ 30 LBS
 Color: White/blue; White/purple; White/green

Ultra-light weight for agile offense, ideal for beginners and advanced players.

QF-11

Arrival time: March 2025

Frame material: Full carbon fiber
 Shaft material: Full carbon fiber
 Weight/Grip: 4U/G5
 Tension: ≤ 28 LBS
 Color: Pink; Blue

Easy to maneuver and control, ideal for beginners.

QINGFENG SERIES

QF-12

Arrival time: March 2025

Frame material: Full carbon fiber

Shaft material: Full carbon fiber

Weight/Grip: 4U/G5

Tension: ≤ 28 LBS

Color: Silver/grey; Silver/pink

Easy to master and control, ideal for beginners.

QF-13

Arrival time: March 2025

Frame material: Full carbon fiber

Shaft material: Full carbon fiber

Weight/Grip: 4U/G5

Tension: ≤ 28 LBS

Color: Pink; Blue

Easy to master and control, ideal for beginners.

SUPERLIGHT SERIES

LORIE 10

Arrival time: March 2025

Frame material: Full carbon fiber

Shaft material: Full carbon fiber

Weight/Grip: 5U/G4

Tension: ≤ 30 LBS

Color: Blue/Pink

Flannelette Bag

High weight for high elasticity expanded sweet area. Ideal for beginners and female players.

SUPERLIGHT SERIES

DREAM

Arrival time: March 2025

Frame material: High strength carbon fiber

Shaft material: High strength carbon fiber

Weight/Grip: 5U/G6

Tension: ≤60LBS

Color: White, Pink

Flanellette Bag

High quality full carbon fiber delivers exceptional power and durability. The spade point shines vertically on the light change.

SUPERLIGHT SERIES

Flannelette Bag

Flannelette Bag

Flannelette Bag

WHITE DEW

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 5U/66
 Tension: <30LBS
 Color: White/pink

Light weight with large sweet area, suitable for beginners.

PEACH BLOSSOM

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 5U/66
 Tension: <30LBS
 Color: White/pink

Light weight with large sweet area, suitable for beginners.

BLUE DOME

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 5U/66
 Tension: <30LBS
 Color: White/purple

Light weight with large sweet area, suitable for beginners.

SUPERLIGHT SERIES

RIDE THE WIND S (4U)

Frame material:	High strength carbon fiber
Shaft material:	Full carbon fiber
Weight/Grip:	4U/SS
Tension:	<30LBS
Color:	White, Gray, Blue

All round lightweight racket offers smooth and stable control.

RIDE THE WIND S (6U)

Frame material:	High strength carbon fiber
Shaft material:	Carbon fiber + Kevlar
Weight/Grip:	6U/SS
Tension:	<30LBS
Color:	Green

Lightweight strikes, swift response.
