Frame material: New high modulus carbon fiber+
Inner foaming+Nano-Resin

Shaft material: M50 high modulus carbon fiber+
Super fine solid shaft

Weight/Grip: 4U/G5

Tension: ≤32LBS

Color: Red

Unleash unstoppable power with aggressive offense. It features new generation M50 carbon yarn combined with High Stacked Carbon Fiber Composite technology, redefining the aesthetics of powerful attack.

ASURA II SPIKE X

Arrival time: To be confirmed

Frame material: New high modulus carbon fiber+
Inner foaming+Nano-Resin

Shaft material: M50 High modulus carbon fiber+
5.8MM solid shaft

Weight/Grip: 4U/G5

Tension: ≤32LBS

Color: Orange

Follow up the victory, strike for the victory. It features a 5.8mm hard slim shaft combined with high strength carbon fiber, offering best anti-torsional performance and hit feeling.

GRAPHENE / Built-in Titanium Wire / High Modulus Carbon Fiber
High Composite Density Shock Absorption System

FLAGSHIP SERIES - SPEED

HOUYI III SP

Arrival time: To be confirmed

Frame material: High modulus carbon fiber+Graphene+
Inner forming

Shaft material: High modulus carbon fiber+
Built-in titanium wire

Weight/Grip: 4U/G5

Tension: ≤35LBS

Color: Purple

With a 46T material shaft reinforced by a titanium core triangle, TORAY carbon fiber, and the special front cap, it redefines the aesthetics of speed through precision engineering.

HOUYI III

Frame material: High modulus carbon fiber+Graphene+
Nano-Resin

Shaft material: High modulus carbon fiber+
Built-in titanium wire

Weight/Grip: 4U/G5

Tension: ≤35LBS

Color: Gold

It has unstoppable attack and improved speed. Made of TORAY carbon fiber, the racket frame has been optimized to provide both speed and stability.

WHIPBLAST K7

- Titanium Alloy
- Aerodynamic Frame
- High Composite Density Shock Absorption System
- Special Front Cap

SUPER FINE SOLID SHAFT

FLAGSHIP SERIES - SPEED

NEW

WHIPBLAST K7

Arrival time: April 2026

Frame material: High strength carbon fiber+ Titanium alloy+Inner foaming

Shaft material: High strength carbon fiber

Weight/Grip: 4U/G5

Tension: ≤32LBS

Color: Pink

Bag

Titanium alloy frame ensures stable protection, while the aero frame enhances whipping effect, achieving speed and control, helping to deliver decisive shots.

FLAGSHIP SERIES - ALL ROUND

Patent No.:ZL200820201080.7

2300 DAREN II

Frame material: High modulus carbon fiber+Nano-Resin

Shaft material: High modulus carbon fiber+Nano-Resin

Weight/Grip: 4U/G5

Tension: ≤35LBS

Color: Blue

Bag

Balance point has been shifted forward to further enhance offensive performance, making HEXAGON synonymous with relentless attacking power.

FLAGSHIP SERIES - CONTROL

Patent No.: ZL200820201080.7

2900 II

Frame material:	High modulus carbon fiber+Nano-Resin
Shaft material:	High modulus carbon fiber+Nano-Resin+ HEXAGON & Golf shaft
Weight/Grip:	4U/G5
Tension:	≤35LBS
Color:	Gold

Bag

Featuring a golf shaft paired with HEXAGON technology, it boosts hitting speed by 10%. The fully sword frame design reduces swing resistance by 35%, making it ideal for speed-focused players.

EXCLUSIVE SERIES FOR INTERNATIONAL MARKET

Flannelette Bag

HYPER SHOT NEX

Frame material: High strength carbon fiber+Inner forming
Shaft material: High strength carbon fiber
Weight/Grip: 3U/G5; 4U/G5
Tension: ≤30LBS
Color: Orange; Blue

Featured with 50T high strength carbon fiber and box frame, it offers extra powerful smashes and accurate controls, ideal for players demanding fast swing and offensive performance.

Flannelette Bag

Patent Application Number: 2025222027664

HYPER SHOT HEXAGON

Frame material: High strength carbon fiber
Shaft material: High strength carbon fiber
Weight/Grip: 3U/G5; 4U/G5
Tension: ≤30LBS
Color: Black/red; Black/purple

Featured a patented HEXAGON shaft design, it has enhanced strength and stability while providing powerful torsional resistance, improving shot response time and accuracy.

EXCLUSIVE SERIES FOR INTERNATIONAL MARKET

Flannelette Bag

HYPER SHOT WIND (4U)

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 4U/G5
 Tension: ≤30LBS
 Color: Rose gold

Featured with high strength carbon fiber, it offers stable and precise control experience.

Flannelette Bag

HYPER SHOT WIND (6U)

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 6U/G6
 Tension: ≤30LBS
 Color: Purple

72g lightweight enables you to swing faster and do more accurate shots.

Flannelette Bag

HYPER SHOT WIND (8U)

Frame material: High strength carbon fiber
 Shaft material: High strength carbon fiber
 Weight/Grip: 8U/G6
 Tension: ≤28LBS
 Color: Blue

65g lightweight enables you to swing faster and do more accurate shots.

RACKET TECHNOLOGY

EAN ANTI-FAKE TECH

Built-in unique ID chip on the bottom cap, making it more difficult to replicate or tamper, offering near absolute anti-counterfeit protection. Take out the phone and use NFC function to verify its authenticity.

GOLF SHAFT

Kumpoo cooperated with FUJIKURA which was the most professional golf shaft manufacturer in Japan of badminton shaft. It can adjust the bending point of hitting effectively by keeping the same inner and external diameter of the shaft to satisfy the diversity demand of players.

DUAL STIFFNESS PATENT SHAFT

It makes a racket both offensive and defensive. There are two different stiffness on both sides of the shaft, offering distinctly different hitting sensations.

Patent No:ZL201420364704.2

10U-TOP LIGHT RACKET IN THE WORLD

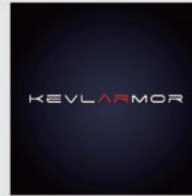

54g (as light as an egg), but the tension can withstand up to 30LBS.

Patent No:ZL201922333792.5

SPIRAL FRAME

The inner and outer sides of the frame flow in opposite directions, giving the head frame a strong streamlined feel and reducing air resistance. The racket frame adopts a concave trapezoidal design at above 3 and 9 o'clock, aiming to reduce wind resistance and increase swing speed; the inverted triangle design is adopted at below 3 and 9 o'clock, providing a more stable structure for the racket frame and ensuring stability during the swing.

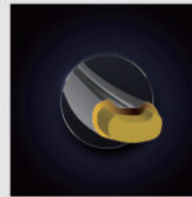

KEVLAR MATERIAL

Kevlar is a strong synthetic fiber that is commonly used in body armor. Kumpoo first applied kevlar to the racket by it combining firmly with carbon fiber to provide higher strength to the frame. The excellent Kevlar avoids making the frame collapse easily and provides more powerful hitting.

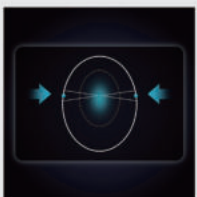

GRAPHENE FRAME

Involving the strength of Graphene, Graphene precise technology effectively enhances the frame by reconstructing molecular patterns of carbon fiber and Graphene. This technology makes light weight rackets bear high tension.

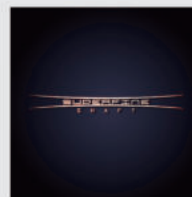

SHOCK ABSORPTION SYSTEM

By using a special process, polyurethane raw material fills into the racket frame and changes into a spongy structure after high temperature and cooling down. It absorbs shock, reduces uncomfortable feelings in arms and improves hitting comfort.

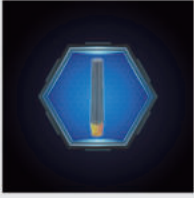

ENERGY COLLECTING AND BALANCE SYSTEM

Located at 3 and 9 o'clock of the frame, precisely controls reset, suppresses racket surface shaking, and enhances racket anti-torsion performance, allowing players to hit back faster, more accurately, and more stably during the second swing.

SUPER FINE SHAFT

Kumpoo shafts vary from 6.6mm and 6.5mm to 6.3mm and 6.1mm. And 6.1mm shaft creates a more flexible and quicker hitting experience for the players.

HEXAGON SHAFT

Changing the shaft from a normal round to a hexagonal shape (5cm above the front cap) brings better anti-torsion performance and a more accurate drop point. It can also make the shaft rebound faster and offer the player a quicker reaction.

Patent No:ZL200820201080.7

ENERGY CORED SHAFT

The technology is to implant the specially processed core material into the inner cavity of the traditional shaft. It can absorb shocks from the frame and then improve the hand feeling.

Patent No:ZL202320834705.8

BUILT-IN TITANIUM WIRE BUILT IN TITANIUM

Known as the metal of the future, titanium has the advantages of light weight and high strength. Combined with super high modulus carbon yarn, three memory titanium wire improve the rebound speed of the shaft and anti-torsion performance of the racket.

WOVEN MANUFACTURING

Woven fabric manufacturing is a high-technology process used in high-end badminton rackets. Woven has excellent stability and maintains its best status while hitting, creating rich patterns and beautiful embossing.

PLIERS TECH

By applying 3K carbon cloth, Kumpoo develops a new patented cap, which fastens the shaft tightly. Compared with traditional rackets, the touch area of shaft and cap increases by 25%. The cap fastens the shaft tightly without any wobble and the anti-torsion of shaft increases greatly.

Patent No:ZL202220048813.8

PLIERS TECH PRO

The front cap is upgraded into a unique shape, which provides a better rebound ability for the shaft. Instead of 3K carbon cloth, 1K carbon cloth has a clearer texture. The inside cap is designed with skidproof stripes, which improve firmness between the cap and handle.

CARBON HANDLE

Compared with traditional wooden handle, carbon handle is tougher, lighter, more durable and not easy to erode by sweat. Carbon handle also provides good control and a comfortable feeling for the players.

CHAMELEON PAINT

A special material that can change into different colors under various lights and angles.

INNER FOAMING SHAFT

Through inner PU foaming technology, it breaks through the limitations of traditional heat moulding, making the internal structure of the carbon fiber smoother. This enhances torsional resistance by 10%, allowing for smoother power transfer and more stable performance. The PU foam material attached to the inner significantly reduces vibration feedback to the hand.

KH-G805 LITE PRO

Color:	A-White/navy blue; B-Light blue; C-White/pink
Upper:	Mesh+TPU+PU
Insole and lining:	Fabric+EVA
Sole:	Natural rubber+MD+TPU+Carbon plate+EVA+Mesh+ACF
Size:	35-45#

Arrival time: January 2026

Remark: With shoe bag

Features: Artificial leather / Anti torsion / Lateral wall / ESS EVA / Hyper sole

- The upper is made of PU and TPU, providing lightness, breathability, and stability.
- TPU in the shoe upper maintains support and balance.
- The sole is equipped with a non-slip rubber outsole, ultra-light midsole, TPU and carbon plate.
- Natural rubber sole with three-dimensional pattern, which is wear-resistant and anti-slip.

- One-piece outsole with lightweight EVA material provides light cushioning.

SHOE TECHNOLOGY

LIGHT PROFESSIONAL BADMINTON SHOES

Kumpoo developed shoes KH-100 in 2009. The new CBS functional rubber and court biting system made the shoes become the lightest in the market.

KPU MATERIAL

Kumpoo was the first to use KPU material in professional badminton shoes, which enhances the wear-resistance, stability and anti-deformation as well as extends the service life.

FITGO

One press and twist, quick lacing! Kumpoo introduces a fast lacing system with tightness accurate to 1mm. With simple knob adjustment the perfect fit tightness is easily achieved. Designed to be durable, the Fitgo can withstand more than 50,000 rotations and pulls of more than 30 kg to ensure long-term reliability.

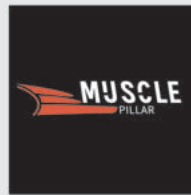

DUO POWER

The finer the structure, the more delicate the foot feeling! The unique layered design of the DUO POWER has two layers of mid-sole, each with a different density. The outer mid-sole is hard for support and protection; the inner mid-sole is soft for cushioning and comfort.

LEOBOOM MIDSOLE

The LEOBOOM MIDSOLE is created by pressurizing and heating the ETPU material to mimic the state of a cell when it divides. This mid-sole has unparalleled light weight and cushioning performance, and players can feel the explosive power and flexibility of cell division when wearing it.

MUSCLE PILLAR

A supporting anti-torsion structure placed on the outsole, inspired by the structure and function of human muscles. The hardness of the muscle pillar is extremely high, even beyond the traditional carbon plate, injecting excellent stability into the badminton shoes. It is specially designed for the arch of the foot, this support structure not only strengthens the arch, but also provides excellent torsion resistance, providing reliable support and sense of safety for the player during every step of the movement.

ACF ARTIFICIAL CARTILAGE FOAM

Mimic the function and structure of cartilage control and adjust its micro-nano structure by physical and chemical methods, so that it is infinitely close to the three-dimensional ultra structure of cartilage, so that we invent a biomimetic material, with the same or better buffer energy absorption effect as cartilage. This innovative material is applied to the midsole and insole of badminton shoes, it can absorb more than 90% of the impact force providing cushioning performance as cartilage.

UHMWPE MATERIAL

Inspired by the bionic structure of silkworm cocoons, this technology uses world-class yarn made from ultra-high molecular weight polyethylene (UHMWPE), offering 2.6 times the elasticity of traditional polyester and 12% lighter than conventional mono yarn. The eco-friendly weaving process breaks away from traditional warp and weft bindings, and the entire process is glue-free, combining the silkworm cocoon-inspired structure for enhanced performance.

SUPERCritical FOAMING MIDSOLE

It adopts supercritical foaming moulding technology, creates a finely structured, uniform foam with tiny, consistent pores. It is lightweight yet high quality. During movement, it offers over 92% energy feedback, with a rebound performance up to 60%, ensuring durability and wear resistance.

W-HOLD

Extending from the forefoot to the heel, the robust lateral wrapping structure provides a stable base for the feet, delivering strong anti-torsion support to resist excessive twisting and deformation, and preventing rollover.

VELOLITE MIDSOLE

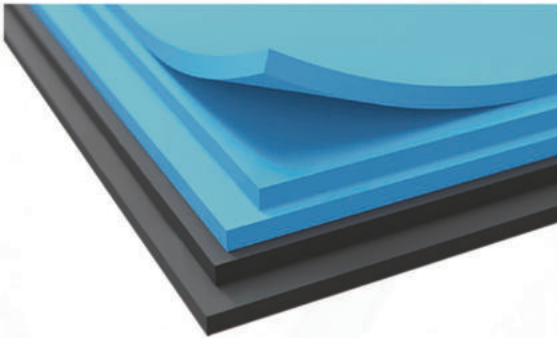

It provides an ultimate ground feel and quick start, with anti-rollover and energy cushioning, offering comprehensive traction for various movement modes. It maintains wrapping and comfort while significantly reducing the physical burden on athletes.

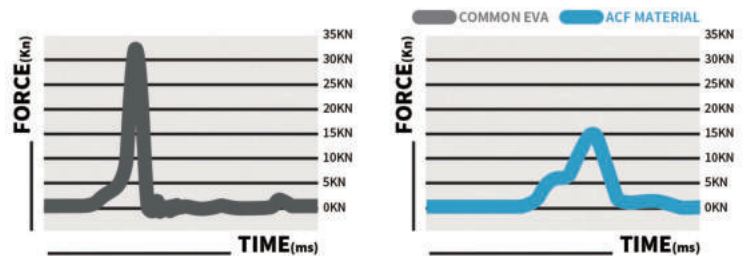

Absorbing 90% of the impact force

Mimic the function and structure of cartilage, control and adjust its micro-nano structure by physical and chemical methods, so that it is infinitely close to the three-dimensional ultra structure of cartilage, so that we invent a biomimetic material, with the same or better energy absorption effect as cartilage. This material is applied to the midsole and insole of badminton shoes, it can absorb more than 90% of the impact force.

- Breakthrough cushioning materials for the 21st century

SHOCK IMPACT FROM DIFFERENT MATERIALS

*COMMON EVA

Common EVA material has a high peak force and a large drop, and the impact force quickly declines after reaching the peak, it is easy to injure human body in the force moment.

*ACF MATERIAL

The peak force of ACF is low, and the curve is gentle, reflecting that the impact force is absorbed in large quantities and the impact force is greatly reduced.

- The protecting effect of ACF

COMMON EVA

COMMON EVA

The impact of one to five times body weight is transmitted sequentially from the bottom to the top, and the knee is severely impacted and damaged.

VS

ACF MATERIAL

ACF

Most of the impact is absorbed by the ACF at the bottom of the foot and is not transmitted upwards, maximizing the protection of the knee from injury.

HIGH REBOUND SUPPORT MIDSOLE

The supercritical midsole combined with a TPU anti-torsion support structure targets areas prone to rollover with a lightweight anti-torsion design. It provides stable support for both feet with high rebound performance.

 SUPERCritical
FOAMING MIDSOLE

Persistent rebound
Comprehensive lightweight

Strong support
Comprehensive protection

● Eco-Friendly and Sustainable

The supercritical foaming process eliminates the need for chemical foaming agents, reducing formamide emissions and simplifying production steps. This not only enhances efficiency but also delivers higher material quality.

● High-Performance Energy Feedback

The foam pore structure is fine and evenly distributed. The material delivers over 92% energy return and up to 60% rebound performance. It efficiently absorbs impact, reducing pressure on joints and muscles during movement. The material has an energy feedback rate of over 92% and a rebound performance of up to 60%. It effectively absorbs impact and reduces stress on joints and muscles during exercise. The material better adapts to movement and landing pattern, improving overall comfort. It achieves greater elasticity at a lower density than the industry standard.

● Long-lasting Shock Absorption and Resilience

It offers long-lasting rebound performance with minimal decay, ensuring consistent support over time.

● Ultra-Light Empowerment

Its ultra-light design improves efficiency dramatically.

W-HOLD

- Extending from the forefoot to the heel, the robust lateral wrapping structure provides a stable base for the feet, delivering strong anti-torsion support to resist excessive twisting and deformation.
- The outsole sidewall and the supercritical midsole work together seamlessly to create high-strength support, enabling more precise stopping and directional changes.

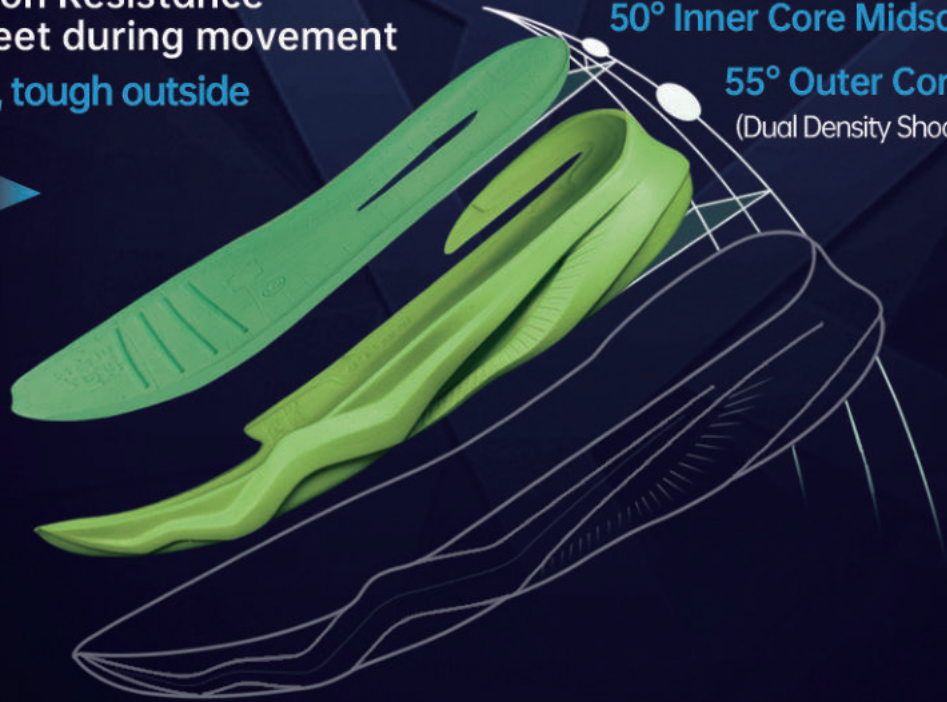

High Torsion Resistance
Support feet during movement
Soft inside, tough outside

50° Inner Core Midsole

55° Outer Core Midsole
(Dual Density Shock Absorption)

Dual Density Shock Absorption Midsole

> 50° Inner core midsole: offer comfortable feet feeling

> 55° Outer core midsole: provide support and stability

Innovative Design

Dual-layer foam construction: the upper layer features soft material for shock absorption, while the lower layer utilizes firm material for support and stability.

Dual Density

Soft and comfortable while providing strong support and wrapping.

VELOLITE Ultra-thin Outsole

Delivers exceptional feel and explosive acceleration

Ultra-thin Midsole

Ultra-lightweight

STABILITY

Through repeated iterations adjusting the heel curvature and forefoot shape, the initial rollover risk commonly seen in ultra-thin outsoles has been completely resolved.

CUSHIONING

Energy pads embedded in both the forefoot and heel achieve effective shock absorption within a millimeter-level space.

WRAPPING

The full-length midsole delivers dynamic wrap-around support, ensuring that every push-off transfers power efficiently, unifying exceptional fit with comfort.

KI-09 High Elasticity Protective Insole

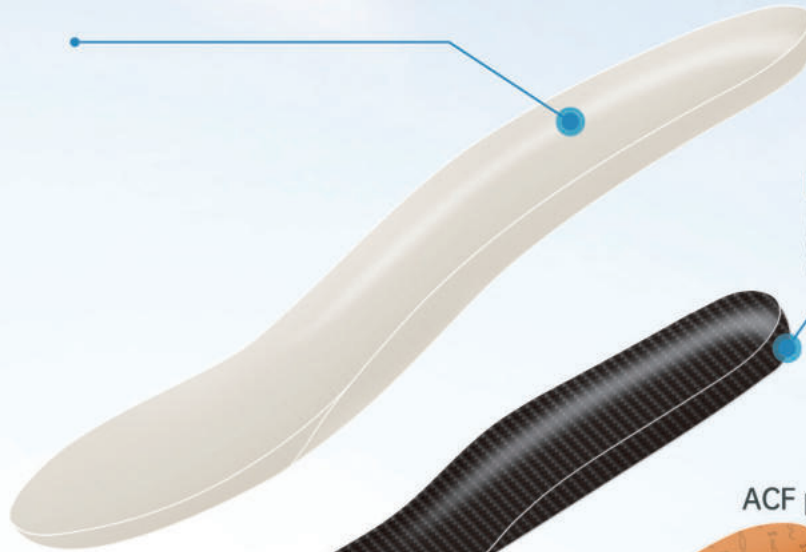

Breathable surface + High-rebound TPE base

Provides a breathable and comfortable underfoot feel. The full-length TPE cushioning layer absorbs impact upon landing, enhancing overall performance and comfort.

Bionic 3D carbon-pattern framework

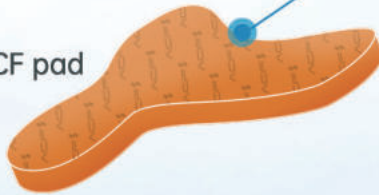

Delivers enhanced stability and support, reinforcing the arch area. Helps improve performance, reduce injury risk, and prevent lateral rollover.

ACF pad

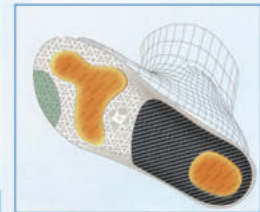

ACF pad

ACF Cushioning pad

Absorbs up to 90% of impact. Reduces vibration generated with each step. Helps minimize muscle and joint fatigue during high-intensity movements.

KI-09 Features:

1. Made from high-elastic, breathable materials, the insole feels soft and keeps your feet dry and fresh.
2. The built-in cushioning pad effectively absorbs impact, significantly reducing fatigue during intense movements.
3. Durable and wear-resistant, it maintains its shape over long-term use without collapsing or deforming.

Measurement of foot length

★ Put the foot flat on the white paper, step on the ground vigorously: Use the pen to mark the longest point at the front and back of the foot, and connect these two points together which is the correct foot length.

★ Remark: For customers with thinner and smaller feet, we recommend buying shoes one size smaller.

FUNCTIONS

Microfiber	High rub resistance, light and soft artificial leather, Improving substantially the durability and comfort level.	TPU Fit	Kumpoo TPU FIT technology can avoid the damage of shoes, provide certain ductility during the movement and maintain the package to feet.
Anti torsion	Guaranteeing midsole stability, preventing over deflecting from extreme sports.	Double air Mesh	Double air-mesh improves the ventilation and air permeability.
ESS EVA	Light and high strength. It can enhance the stability of sole during the movement.	3E wide last	Kumpoo developed a special shoes last for Chinese market. Comparing to other brands' 2.5 last, it is more suitable for the East Asians and provides a more comfortable fit.
Super light	Kumpoo has developed a super light rubber and insole which can make the shoes light as well as reaching the rigorous test requirement. It can increase the wear resistance and grip of the shoes.	Lateral wall	Kumpoo's unique molding and patent sole design can prevent the feet spraining.
C.B.S	The latest CBS system makes the lightest professional badminton shoes.	Metallic pu	A kind of special artificial leather which has superior softness, beautiful metal color appearance and excellent comfortable sense.
Hyper sole	Hyper sole and 12mm shock absorbers which are used in the front and heel of shoes will make the shoes more stable and shock absorbers.	Air hole	The six air holes of the sole will increase the ventilation and perspire as well as keep the feet dry and comfortable.
LEOBOOM mid-sole	The LEOBOOM mid-sole is created by pressurizing and heating the ETPU material to mimic the state of a cell when it divides. This mid-sole has unparalleled light weight and cushioning performance, and players can feel the explosive power and flexibility of cell division when wearing it.	DUO POWER	The finer the structure, the more delicate the foot feeling! The unique layered design of the DUO POWER has two layers of midsole, each with a different density. The outer midsole is hard for support and protection; the inner midsole is soft for cushion and comfort.
Knob button	One push and twist for quick lacing! Elasticity can be accurate to 1mm, easy to adjust to the right tightness for you. The device can withstand over 90,000 rotations and 36kg of pulling force, strong and durable.

Navy blue

Product features:

- Windproof brim features an adjustable drawstring, a double-headed zipper at the front, and adjustable cuffs with Velcro.
- Zippers are added on both sides of the hem for better adjustment of the fit.
- The back has a heat retention function, and the long design covers the waist and hips, enhancing the warmth range.
- Outer fabric is waterproof and anti-static, while lining fabric is anti-static, ensuring dryness in rainy and snowy weather.
- Loose design accommodates various body types, making it convenient for sports.

The waist of women series is smaller

KB-631

Professional Bag-Holds 3 Rackets

Color: A-Purple/white; B-Black/white

Material: Synthetic leather+Fabric

Size: 70*11*27cm

Arrival time: January 2026

A

B

Product features :

- ◆ Made of PU with toothpick texture, soft, waterproof and wear-resistant.
- ◆ Lightweight and portable, with multifunctional pockets and dual carry options.
- ◆ Equipped with multifunctional slip pockets inside for organized storage.

KB-632

Ita Series-Square Bag

Color: A-White; B-Yellow/white; C-Blue/white

Material: Fabric

Size: 48*27*18cm

Arrival time: May 2026

A

B

C

Product features :

- ◆ Made of polyester composite fabric, the bag is light and soft, yet strong and wrinkle-resistant.
- ◆ Front attachment loop for display of various accessories or decorations.
- ◆ The front pockets features a transparent PVC cover and one of them comes with a display board, allowing personalized decoration with badges, keychains, or small plush toys.
- ◆ Functional compartments such as a half-open racket section and a dedicated shoe compartment provide refined protection for badminton equipment.
- ◆ Offers strong storage capacity, with a inner zip pocket in the main compartment, mesh side pockets on both sides, plus a back zip pocket.
- ◆ Equipped with both long and short shoulder straps for single-shoulder or crossbody carry, this bag combines the features of an ita bag and a badminton bag to suit various usage scenarios.

KB-634

Square Bag-Holds 3 Rackets

Color: A-Blue/white; B-Black/off white

Material: Fabric

Size: 72*32*13cm

Arrival time: January 2026

A

B

Product features :

- ◆ Made of 900D Oxford fabric as the main material, this bag features a minimalist design with a prominent kumpoo logo.
- ◆ Features a multi-functional front pocket and a D-ring for additional attachment, providing strong storage capability.
- ◆ Equipped with a dedicated shoe compartment, an interior racket divider for protection, and additional slip pockets for organized storage.
- ◆ Carried over one shoulder, it is slimmer and lighter than standard box-shaped bags for easier portability.

KB-661

Professional Bag-Holds 6 Rackets

Color: A-Black/white; B-Khaki/white

Material: Fabric

Size: 59*22*31cm

Arrival time: January 2026

A

B

Product features :

- ◆ Made from high-quality matte 600D plain-weave fabric, this specially treated material not only gives the bag a refined, understated look, but also offers excellent abrasion and tear resistance.
- ◆ Separate racket compartments for racket protection. ◆ Separate shoe compartment, clean and convenient.
- ◆ The large main compartment offers ample space to accommodate all your essentials — from spare clothing to personal items — keeping everything neatly organized and easily accessible.
- ◆ A front pocket with magnetic closure and two pockets with zipper closure.

KB-662

Square Bag-Holds 6 Rackets

Headband KHD-402

Material: 74% cotton+24% polyester fiber+2% spandex

Size: 18*5cm

Packing: 1pcs/pack

A-Navy blue

B-Blue-cyan

C-Khaki

Towel KT-401

Material: Ultra-soft fiber

Size: 40*90cm

Packing: 1pcs/pack

Insole
KI-01A

Material: EVA
 Size: 35-45
 Feature: Breathable; Anti-slip; Deodorant

Insole
KI-06

Material: Mesh + EVA
 Size: 35-45
 Feature: Wear-resistant; Breathable; Anti-slip

Kumpoo Stringing Crew

To establish a professional industry standard for stringing, KUMPOO has partnered with the global authority in stringing — United States Racquet Stringers Association (USRSA) — to jointly launch the “Kumpoo Stringing Crew”.

This initiative not only highlights KUMPOO's deep influence in professional equipment and technical research, but also marks the first systematic introduction of USRSA's internationally renowned certification system into China.

Leveraging KUMPOO's advanced stringing equipment and profound understanding of racket performance, Kumpoo Stringing Crew will provide world-class, standardized training for badminton enthusiasts and professionals across China, empowering every dedicated stringer to reach new heights in their career.

KSM-5X

Description: New string gripper; Patented clamp; Semi-open drawer; Lightweight track

Color: Orange/gold/black

Voltage: 100-240V

Functions Description

1. Innovative String Gripper

It features a modular design that enables parallel stringing, effectively reducing friction and improving stringing efficiency. It also ensures uniform tension across every string, allowing the racket to deliver optimal elasticity and control.

2. Precise Tension Adjustment

It's equipped with a 0.5 lbs micro-adjustment function to meet precise tension requirements. At the same time, its overall operating speed has been significantly improved, enabling high-quality stringing to be completed in a short period of time.

3. Universal Compatibility

It's compatible with various types of strings, meeting diverse stringing needs.

4. Lightweight & Quiet

It features a lightweight track and silent clamp. It can shorten the distance to the racket while ensuring a quiet and stable operating process.

Racket Mounting System

1. Six Points Mounting System

The unique six points mounting system provides comprehensive and stable support for the racket. It is compatible with various frame shapes and sizes on the market, enabling quick and precise positioning to ensure the racket remains in optimal condition throughout the stringing process.

2. Durable Patented Clamp

The patented clamp can quickly lock onto different string gauges, offering convenient and precise. Featuring a durable alloy four-tooth dual-use design, the clamp adapts to various string types and significantly extends the service life of durable components.

Support and Storage System

1. Manual Crank Lift

The manual crank lift is simple and flexible to operate, allowing effortless height adjustment based on actual needs.

2. Thoughtful Storage

The carefully designed storage drawer features a semi-open rotating structure that keeps various tools organized without taking up extra space. It maintains tidiness while ensuring that all tools are easily accessible, effectively improving stringing efficiency.

KSM-726

Description: Curved rails; Automatic brake system; Memory function; Pneumatic adjustable pole; Pre-stretch setting

Color: Red/white

Voltage: 100-240V

Functions Description

1. Chain drive combined with high-precision pressure sensor and microcomputer processor to accurately control tension
2. Auto-manual locking switch, delay locking function
3. Optional pre-stretch functionality at 5% -20%
4. Remember up to 3 personal user settings

Racket Mounting System

1. Tension control system with true constant pull avoids any tension loss during the stringing process
2. Longer racket rail
3. Six points mounting system
4. 360 degree swivel turntable with automatic brake system
5. Suited to every kind of badminton racket, mounting poles are made of stainless steel that is anti-corrosion
6. Four racket clamps are made of aluminium alloy, anti oxidation and anti friction

Support and Storage System

1. Steel machine pole, ABS plaque
2. Pneumatic adjustable pole height from 105cm to 115cm
3. Rotary ultra-large tool storage tray
4. Hidden power connection

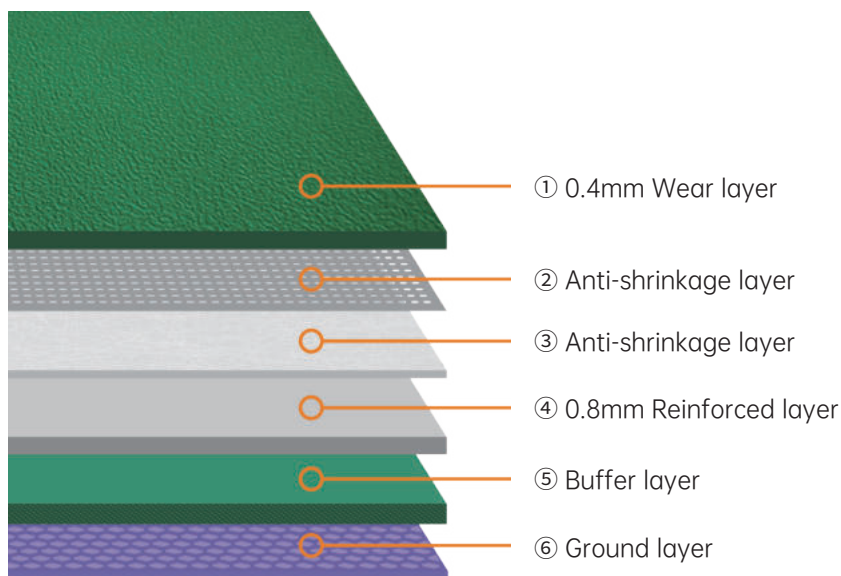

KSF-10

Product Features:

Excellent shock absorption and anti-slipping, fast rebound

1. Certificated by the Badminton World Federation for Grade 1.
2. Longevity with minimal wear, stable friction performance, abrasion resistance, and anti-slip.
3. Eco-optimized with 100% virgin PVC materials for superior stability and deformation resistance.

Model: KSF-10

Type: For tournament

Grade: BWF Grade 1

Color: Green

Texture: Gravel

Material: PVC

Installment method: Welding

Weight: 370kg

Size: 15*7.2m

Thickness: 4.8±0.2mm

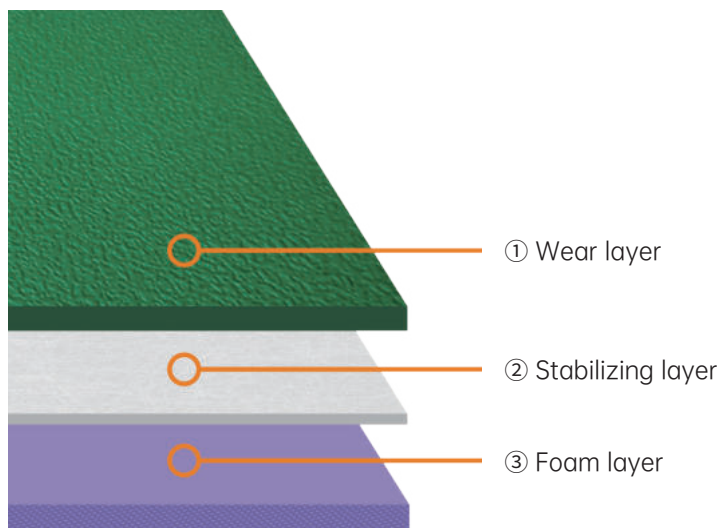

KSF-30

Product Features:

Excellent stability and abrasion resistance

1. Certificated by the Badminton World Federation for Grade 3.
2. Great stability, abrasion resistance, and anti-slip.
3. Good shock absorption performance, offering better comfort and protection.

Model: KSF-30

Type: For tournament

Grade: BWF Grade 3

Color: Green

Texture: Crystal sand

Texture: PVC

Installment method: Welding

Weight: 320kg

Size: 15*7.2m

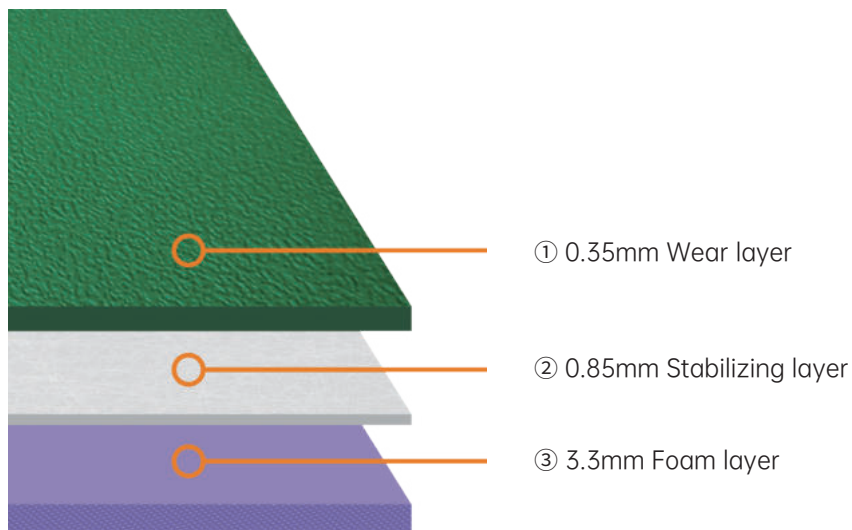

Thickness: 4.5±0.2mm

KSF-50

Product Features:

Economical and practical

1. It features a crystal-sand texture commonly used in tournament, offers excellent slip resistance.
2. The 1.2 mm wear-resistant layer enhances the surface hardness and overall durability.
3. The 3.3 mm PVC foam layer provides superior protection, reducing sports-related injuries for athletes.

Model: KSF-50

Color: A ■ B ■ C ■ D ■ E ■

Texture: Crystal sand

Material: PVC

Weight: 340kg (4.5mm)

Dimension: 15*7.2m (15*1.8m*4pcs)

Thickness: 4.5mm/5.0mm/5.5mm/6.0mm

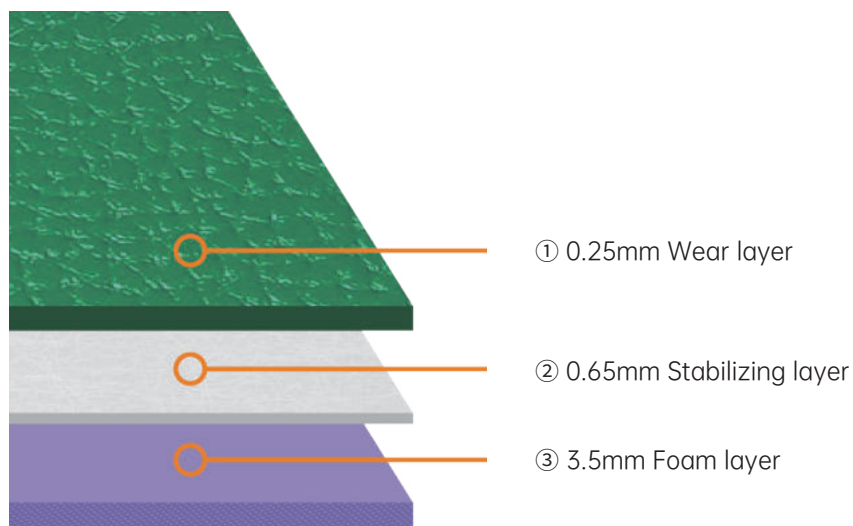

Installment method: Welding

KSF-70

Product Features:

Economical and practical

1. It features a lychee texture, offers excellent slip resistance.
2. The 3.5 mm PVC foam layer provides good shock absorption performance to beginners.

Model: KSF-70

Color: A ■ B ■ C ■ D ■ E ■

Texture: Lychee pattern

Material: PVC

Installment method: Welding

Dimension: 15*7.2m (15*1.8m*4pcs)

Thickness: 4.5mm/5.0mm/5.5mm/6.0mm

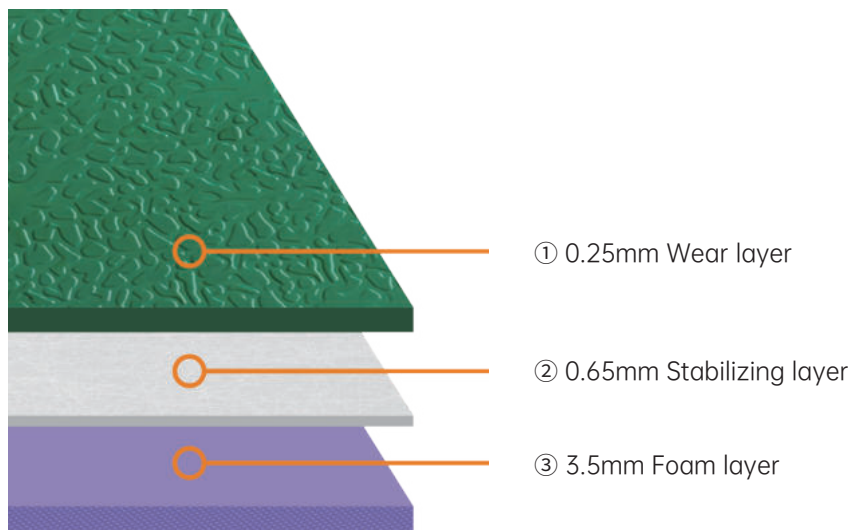

Weight: 320kg (4.5mm)

KSF-71

Product Features:

Economical and practical

1. It features a gemstone texture, offers excellent slip resistance, which is easy to clean up.
2. The 3.5 mm PVC foam layer provides good shock absorption performance to beginners.

Model: KSF-71

Color: A ■ B ■ C ■ D ■ E ■

Texture: Gemstone pattern

Material: PVC

Installment method: Welding

Dimension: 15*7.2m (15*1.8m*4pcs)

Thickness: 4.5mm/5.0mm/5.5mm/6.0mm

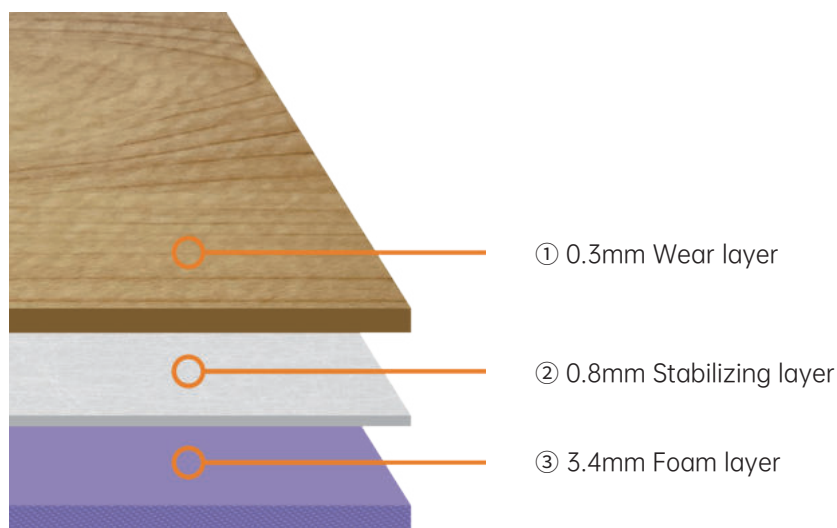

Weight: 320kg(4.5mm)

KSF-72

Product Features:

Wear resistant & anti-slip

1. Produced using transfer-printing technology, it delivers high wood-grain clarity.
2. 0.3mm pure PVC transparent wear-resistant layer significantly extends the service life.
3. The surface features a hammered-texture embossing, making daily maintenance and cleaning more convenient.

Model: KSF-72

Color: Maple

Texture: Maple

Thickness: 4.5mm

Material: PVC

Installment method: Welding

Weight: 340kg

Dimension: 15*7.2m (15*1.8m*4pcs)

KNP-10

Product Features:

Certificated net post by the Badminton World Federation, good protection, easy mobility, durable

1. The movable cast-iron base is equipped with premium silent casters for easy mobility.
2. The top sliding groove and cassette-style tensioner allow the net to be tightened effortlessly, ensuring convenient operation and preventing loosening.
3. The lower section is fitted with hardware screws to secure the net rope firmly.
4. Made from one-piece cast iron with an electrostatic powder-coated finish, the structure achieves a hardness level of 2H, offering high durability and stable performance.
5. The base includes adjustable counterweight iron blocks, allowing users to freely choose weights from 10kg to 80kg to meet different stability requirements.

Model: KNP-10 Grade: Tournament Color: Red Material: Cast-iron Installment method: Manual assembly

Weight: 180kg/set (counterweight iron blocks 80kg) Dimension: 67*45*15.8cm (base); 155cm height (post)

KNP-52

Product Features:

Professional net post, easy mobility, durable

1. The movable cast-iron base is equipped with premium silent casters for easy mobility.
2. The top features a sliding groove, along with a stainless-steel tensioner and metal crank handle, allowing the net rope to be tightened effortlessly without loosening. The inner side is equipped with stainless-steel hooks to securely fasten the net.
3. Made from one-piece cast iron with an electrostatic powder-coated finish, the structure achieves a hardness level of 2H, offering high durability and stable performance.

Model: KNP-52

Color: Red

Installment method: Manual assembly

Material: Cast-iron

Weight: 180kg/set

Dimension: 60*42*20cm (base); 155cm height (post)

KNP-51

Product Features:

Adjustable double net posts, suitable for 15cm-80cm distance between 2 courts

1. The movable cast-iron base is equipped with premium silent casters for easy mobility.
2. The top features a sliding groove, along with a stainless-steel tensioner and metal crank handle, allowing the net rope to be tightened effortlessly without loosening. The inner side is equipped with stainless-steel hooks to securely fasten the net.
3. Made from one-piece cast iron with an electrostatic powder-coated finish, the structure achieves a hardness level of 2H, offering high durability and stable performance.
4. Adjustable base is suitable for 15cm-80cm distance between 2 courts.

Model: KNP-51

Color: Red

Installment method: Manual assembly

Material: Cast-iron

Weight: 38kg/set

Dimension: 44*28*8cm (base); 155cm height (post)

KNP-64

Product Features:

General net posts, moderate weight, economical and practical

1. The movable cast-iron base is equipped with premium silent casters for easy mobility.
2. The top features a sliding groove, along with a stainless-steel tensioner and metal crank handle, allowing the net rope to be tightened effortlessly without loosening. The inner side is equipped with stainless-steel hooks to securely fasten the net.
3. Made from one-piece cast iron with an electrostatic powder-coated finish, the structure achieves a hardness level of 2H, offering high durability and stable performance.
4. High-quality ABS shell, not easily damaged, with strong load-bearing capacity.

Model: KNP-64

Color: Blue/Red

Installment method: Manual assembly

Material: ABS

Weight: 160kg/set

Dimension: 69*50*28cm (base); 155cm height (post)

KNP-62

Product Features:

Training net posts, light weight, easy mobility

1. The movable cast-iron base is equipped with premium silent casters for easy mobility.
2. The top features a sliding groove, along with a stainless-steel tensioner and metal crank handle, allowing the net rope to be tightened effortlessly without loosening. The inner side is equipped with stainless-steel hooks to securely fasten the net.
3. Made from one-piece cast iron with an electrostatic powder-coated finish, the structure achieves a hardness level of 2H, offering high durability and stable performance.
4. High-quality ABS shell, not easily damaged, with strong load-bearing capacity.

Model: KNP-62

Color: Yellow

Installment method: Manual assembly

Material: ABS

Weight: 120kg/set

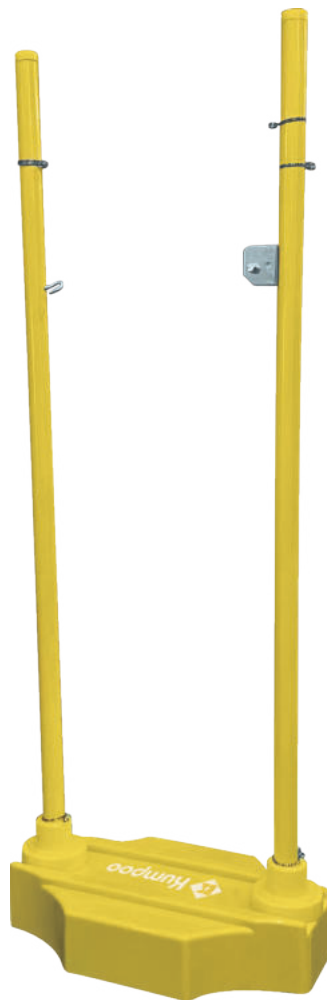

Dimension: 78*37*14cm (base); 155cm height (post)

KNP-61

Product Features:

ABS unadjustable double net posts, economical and practical

1. The movable cast-iron base is equipped with premium silent casters for easy mobility.
2. The top features a sliding groove, along with a stainless-steel tensioner and metal crank handle, allowing the net rope to be tightened effortlessly without loosening. The inner side is equipped with stainless-steel hooks to securely fasten the net.
3. Made from one-piece cast iron with an electrostatic powder-coated finish, the structure achieves a hardness level of 2H, offering high durability and stable performance.
4. High-quality ABS shell, not easily damaged, with strong load-bearing capacity.
5. Unadjustable base, suitable for 60cm distance between 2 courts.

Model: KNP-61

Color: Yellow

Installment method: Manual assembly

Material: ABS

Weight: 35kg/set

Dimension: 56*35*13cm (base); 155cm height (post)

KBN-10

Product Features:

Suitable for professional tournaments

1. Precision-stitched borders prevent fraying and tearing, staying firm under powerful smashes.
2. 1.8cm mesh size with millimeter-level accuracy, fully compliant with BWF regulations.
3. Knotted construction enhances tensile and impact resistance, keeping the net tight and stable over long-term use.
4. Round metal eyelets distribute tension evenly and reduce wear, maintaining tightness through repeated setup.
5. Velcro adjustment ensures easy tightening and prevents loosening.
6. Certificated by BWF, suitable for high level tournaments.

Model: KBN-10

Color: Red/white

Material: Polyester

Weight: 0.5kg/pcs

Dimension: 6.1m*76cm, 1.8*1.8cm (mesh size)

KUC-50

Product Features:

Easy mobility, high safety factor

1. Detachable wheels allow easy movement and quick assembly, saving time and effort.
2. Main tube $\varnothing 32$ mm with 2.0 mm thickness provides strong tensile strength and long-lasting durability.
3. Hollow seats and wood-grain boards made from eco materials; ergonomic seat curvature ensures comfortable sitting and flexible extension.
4. High load-bearing capacity, wear-resistant and durable, ensuring enhanced safety.
5. Made from one-piece cast iron with an electrostatic powder-coated finish, the structure achieves a hardness level of 2H, offering high durability and stable performance.

Model: KUC-50

Color: Yellow

Material: Steel+Plastic+Wood

Weight: 30kg

Dimension: 96*68*181cm
